over that I began to be and be admitted. **Chad Talks** In France Cardinal Tomas Li Snagged

Line is an least The state of the s Panel Is Unable To End Impasse

The Associated Press VITTEL, France - The 10th annual summit conference of France and its African friends ended Tuesday without reaching agreement on how to pursue a negotiated settle-

The conference chairman, President François Mitterrand of France, said at a news conference The bellet star Alexandrian and and the bellet star and the bellet star and the sta that he and the leaders of 38 Afri-Chad has had a hard time keep-

ment in Chad.

Complements to produce the product of the product o diplomats fed. Page 5. can countries reached a consensus on the need to restore the territorial integrity of Chad and seek a "na-

ing its UN mission open and its

tional reconciliation" among its But a nine-nation subcommittee set up to propose ways of achieving

these aims became deadlocked between those supporting President Hissène Habré and those support-ing his rival, Goukouni Oueddei. The committee chairman, President Ahmed Sekou Toure of Guinea, said at the same news confer-

ence that four or five countries had blocked a draft resolution calling for general peace talks among 's political groups, but recognizing Mr. Habre as president. He refused to name the countries

that blocked the agreement. Mr. Habré earlier had dropped long-standing objections to holding direct peace talks with Mr. Goukonni and other rebel leaders. Mr. Goukouni had sent word to the conference that he was pre-

pared to confer with Mr. Habre without conditions. Mr. Mitterrand and Mr. Sekou Touré declined to give détails of the subcommittee's unsuccessful draft statement or to explain the objec-

tions to it. Mr. Sekou Toure said the text could not be published "for. lack of consensus." Before the conference, Mr. Habre had rejected direct negotia-tions, describing Mr. Goukouni as

a "Libyan puppet" and a mouthpiece intended to justify the Libyan nilitary invasion of Chad.

Mr. Habre refused to talk to

in eastern France. .. Delegatioo sources said it was le at the conference that French military support for a counteroffensive to recapture the key

northern town of Faya-Largeau. French officials said Mr. Mitterrand and Mr. Habré met privately for 30 minutes Tuesday morning, their first meeting since the deployment of several thousand French paratroopers to halt the advance of Mr. Gookouni's forces and their Libyan allies. .

No details of their discussion were disclosed, but Maurice Ka-mistogoy, Mr. Habré'a press spokesman, said Mr. Habré reiterated to the French leader his readiness to open peace talks.

Mr. Sékou Touré had taken the initiative at Monday's opening session to propose secret talks on Chad on the sidelines of the summit conference.

He had said that Mr. Habre had given the other African leaders and Mr. Mitterrand "a formal assurance that he is completely ready to meet with all Chadian groups to seek political unity and national reconciliation."

Mr. Goukouni also claims to be president of Chad and is recognized as such by Colonel Moamer Qadhafi of Libya and several other African leaders. These include President Denis Sasson-Nguesso of Congo and Preident Mathieu Kérékou of Benin, who are both taking

part in the conference.

Mr. Sassou-Nguesso conferred with Colonel Quadhafi and Mr. Goukouni in Tripoli, the Libyan capital, before the Vittel conference. A spokesman for the Congo leader said he informed the conference participants that Mr. Gonkouni was ready to open talks with Mr. Habre without conditions and

that Colonel Qadhafi concurred. Mr. Habré, Mr. Sékou Touré, Mr. Sassou-Nguesso and the presidents of Gabon, Senegal, the Ivory Coast, Zaire, Togo and Benin met as a nine-nation subcommittee to draft proposals for possible peace talks to be endorsed by the summit

Mr. Sekou Toure said the subcommittee formulated a French and African position on how to help Chad find peace within a framework safeguarding its "sovereignty, its territorial integrity and the unity of its people."

Mr. Kamistogoy said earlier that Mr. Habré still insisted that any peace talks with Mr. Goukouni and other rebels would have to convene in the capital, Ndjamena, a condition virtually certain to be rejected

by Mr. Goukouni. It was not immediately clear whether Mr. Habré, in his talks with Mr. Mitterrand and the African leaders, had explicitly dropped this condition, and Mr. Kamistogoy said be was not informed of details of the subcommittee's dis-

■ Strike at U.S. Bases

More than 20,000 Filipino workers at U.S. military bases in the Philippines began an indefinite strike Monday over demands for wage increases. The Washington Post reported from Manila. Their union leader said the ac-

tion had nothing to do with poblical conditions in the Philippines. Spokesmen for the two main taining and possibly escalating the bases - Clark Air Base, bome of the U.S. 13th Air Force, and Subic Bay Navai Base, the logistics and depot center for the U.S. Seventh In Bangkok, Thai officials ex- Fleet - said the strike was by the pressed disappointment at the maintenance personnel, clerks,

Reagan Signals That U.S. Will Propose Destroying Older Nuclear Weapons

By Lou Cannon

WASHINGTON - President Ronald Reagan sent the U.S. negotiating team back to Geneva on Tuesday with new proposals and a challenge to the Soviet Union to "Start negotiating in good faith" to reduce the strategic nuclear arse-

nals of the two superpowers.

"Let me emphasize that the United States has gone the extra mile," Mr. Reagan said in remarks in the White House Rose Garden. "Everything is on the table."

The centerpiece of the revised U.S. approach is a version of the "build-down" concept advocated by Senator William S. Cohen, Republican of Maine, and other senators as a condition of their support for the administration's proposed deployment of the MX intercontinental ballistic missile.

In its original form, the proposal called for destruction of two old missiles for each new one deployed. The proposal that U.S. negotia-

tors will take to the Russians in Geneva applies different replacemeni ratios to land- and submarine-based missiles and bombers and includes a provision calling for percent reduction in strategic nuclear arsenals each year.

Another key element involves a willingness to trade Soviet advantage in strategic nuclear missiles for U.S. advantages in bombers in an effort to reach an agreement,

"We seek limits on the destruc tive capability of missiles," Mr. Reagan said, "and recognize that the Soviet Union would seek limits on bombers in return. There will have to be trade-offs and the United States is prepared to make them, so long as they result in a more stable balance of forces." Mr. Reagan said he sought ways

"broaden America's bipartisan

approach to our overall arms effort" and, as an example, named R. James Woolsey, a Democrat who was undersecretary of the navy in the Carter administration, to the U.S. oegotiating team.

Mr. Woolsey is a member of the President's Commission on Strategic Forces, headed by Brent L. Far East command had been in the build-down approach.

newed call for a nuclear arms agreement with blunt criticism of the Russians for failing to respond to earlier U.S. initiatives.

"We have gone a very long way to address Soviet concerns," Mr. Reagan said. "But the Soviets have yet to take the first meaningful step to address ours." He also assailed the Soviet

Union earlier in the day during a White House welcome of President Karl Carstens of West Germany. Mr. Reagan accused the Russians of stalling on negotiations to reduce medium-range missiles in

Europe and pledged that cruise and Pershing-2 missiles would be deployed in West Germany, Britain and Italy beginning in December unless the deadlock is broken.

But while he passed up no opportunity during the day to blame the Russians for foot-dragging, he also expressed renewed willingness to meet President Yuri V. Andropov in a summit meeting.

Mr. Reagan worked out the fine points of the proposals Monday afternoon at a meeting with several members of his strategic forces panel and at another session with a bipartisan group of six Senate and House members who have been pushing the build-down concept.

Senator Charles H. Percy, the Illinois Republican who is chairman of the Senate Foreign Relations Committee, called the understandings reached with the White House "the first time in the history of the Congress and the executive branch where we have worked out jointly an arms control proposal in which we are truly united.

Representative Albert Gore Jr., a Tennessee Democrat, said, "I think when the president makes his ancouncement ... it will be seen as a significant change in our position and one which will command bipartisan support of people in this

Soviet Air Force Aides Reportedly Removed

By Dusko Doder Washington Post Service

MOSCOW --- Several senior officers of the Soviet Far East military command have been remove from their jobs for what Soviet sources describe as a failure of Soviet air defense forces to halt the flight of the South Korean passenger jet earlier than it did.

The sources said Soviet interceptors had failed to locate the Korean plane during its flight over Kamchatka Peninsula although the aircraft was followed by radar on the ground.

Soviet jet lighters established both radar and visual contact with the Boeing 747 only after it reentered Soviet airspace over the island of Sakhalin and shortly before it was shot down. All 269 persons aboard were killed.

The sources said that the Soviet ficials in Moscow on several occa-The president coupled his re- sions before the downing of the

plane. They suggested that the po-litical leadership had not been con-

The identities of the commanders reportedly removed from their posts were not disclosed.

An oblique but sharp indictment of the performance of Soviet Far East air defense command was made recently by Air Marshal Piotr Kirsanov, formerly one of the top commanders in the Far East and now a counselor to the defense

In an article in Pravda, Marshal Kirsanov, while ostensibly justifying the shooting down of the aircraft, indirectly criticized the failure of air defeose forces for allowing the plane to emit bursts of "coded intelligence data" for two hours before it was downed.

Even before the Korean plane entered Soviet airspace, he said, it was clear that the aircraft was a part of a U.S. iotelligence effort to monitor the disposition and fight readiness of Soviet forces in the Far

The account by Soviet sources of the incident suggested that the failure of Soviet interceptors to establish visual contact with the Korean plane may have led the Far East military command to conclude that the aircraft was on an espionage mission and to decide that it should

be brought down by any means. It also suggested that the Soviet high command must have been involved in the decision and that it was presumably made on the basis of information provided by local commanders.

This account appears to be inconsistent with the official version of the incident provided by Marshal Nikolai Ogarkov, the Soviet chief of staff, who asserted that Soviet forces could have shot down the aircraft over Kamchatka with surface-to-air missiles "even without sending jet fighters into the air." The plane was brought down near Sakhalin by a missile fired by a fighter.

But a closer reading of Marshal Ogarkov's Sept. 11 press conference suggests that he may have sought to deflect questions about the effectiveness of Soviet air de-

Marshal Ogarkov made no mention of Soviet interceptors actually establishing visual contact with the South Korean airliner or firing warning shots while it was over Kamchatka and flying over "one of the most important Soviet strategic nuclear bases."

During this portion of the flight

according to Marshal Ogarkov, Soviet ground stations and aircraft had unsuccessfully tried to establish contact with the Korean plane on the international emergency frequency of 121.5 megacycles.

But he said Soviet intercepto planes established both radar and visual contact with the jetliner after it entered Soviet airspace over the island of Sakhalin.

He said Soviet jets gave warning signals in an effort to force the pilot to land at a Soviet airfield.

Before it was shot down, the plane also flew over secret military installations on Sakhalin.

Western observers said they found it hard to believe that the Russians, had they indeed believed that the plane was on a spy mission. would have allowed the aircraft to leave Kamchatka and enter international airspace over the Sea of Okhotosk if they had located the plane at that point Marshal Ogar

Circumstantial evidence suggests that the plane was located by Soviet interceptors sometime after it entered Soviet airspace over Sakhalin and that local commander had ordered its destruction as it was about to leave Soviet airspace.

LAVA FLOW — Molten rock poured onto the grounds of the junior high school in Ako on Miyakejima Island, south of Tokyo, burning buildings. Earthquakes and an eruption by the Mount Oyama volcano continued Tuesday, forcing thousands of people from their homes. Ako was the hardest hit area on the island with lava burying most of its 500 homes.

who command huge block votes 10 Said to Die Leaders of some of the biggest unions have warned Labor activists that they can never again hope to win a general election unless they In Fighting In Pakistan

They said eight protesters and two soldiers died in a gunfight last-ing several hours in Mirpur Bhutto. tains 8 hard-line leftists, 12 on the a village north of Larkana and home of the executed former prime minister, Zulfikar Ali Bhutto.

Officials confirmed one death in the fight, which came on the 51st day of an opposition campaign to force President Mohammed Zia ul-Haq to quit and call immediate

They said people had fired on security forces from houses in the

village and they returned fire.
Not far from Mirpur Bhutto,
government troops blocked the
demonstrators and tried to disperse them as they shouted "end martial law" and "death to General Zia." The village is 800 miles (1,287 kilometers) southwest of Islamabad on the outskirts of Larkana.

The opposition sources said troops had cut off Mirpur Bhutto, which they entered Tuesday morning, apparently to search for arms in the home of Mumtaz Ali Bhutto, who was governor of Sind when his cousin Zulfikar was prime minister. The former prime minister was executed in 1979, two years after the military coup that brought President Zia to power.

Meanwhile, in a message sm gled from his jail cell, the Sind president of Mr. Bhutto's Pakistan People's Party appealed to General Zia to hand over power to the judiclary by Oct. 15 to allow it to supervise immediate elections, Ghulam Mustafa Jatoi also called on military leaders to put

> Shamir Solidifies Coalition Mr. Shamir postponed going to the Knesset, or parliament, with his

> new government until next week and shored up his coalition Tues-day, The New York Times reported from Tel Aviv.

Six coalition members who had threatened not to support a narrow coalition because they favored a broad national government interpreted the postponement as a con-cession to them. At least three indi-cated they would vote confidence in Mr. Shamir.

Explaining the seeming reversal, one of the six, Yitzhak Berman, said that in postponing presenta-tion of his government, Mr. Shamir had met the third and final term of their ultimatum. He had met the first two by inviting the Labor op-position to join the government and by offering them commensu-rate representation in the cabinet. The third was that be allow a rea-country to the property sonable amount of time for negoti-ations with Labor before forming a Darrow coalition.

Members of the group said they would make a final effort next week to promote a broad coalition. The prime minister-designate also won the support of four depu-

ties of the orthodox Agudath Israel party with renewed assurances that his government would carry out religious commitments that the outgoing government had not. Without the votes of the six breakaway coalition members and

the four Agudath Israel members, Mr. Shamir had been able to count on only 54 votes compared to 56 for WORLD BRIEFS

U.S. Judge Bars Extraditing IRA Man

SAN FRANCISCO (Combined Dispatches) — A federal judge has ruled that an accused Irish Republican Army terrorist cannot be extradited to England to face murder and bombing conspiracy charges because the acts were part of a "political uprising" against British rule in Northern

U.S. District Judge Robert P. Aguilar on Monday ordered the release from jail of William Joseph Quinn, 35, accused of killing a London policeman in 1975 and conspiring in an IRA plot in which letter bombs were sent to a Catholic bishop, a British judge and a newspaper executive and explosives were planted at a railroad station and two restaurants. Two of the bombs exploded, causing serious injuries.

Tuesday, British officials in London said that U.S. authorities were

appealing the decision.

appearing the decision.

Undge Agnilar upheld Mr. Quinn's contention that extradition was preciously under a treaty between the United States and Britain that forbids extradition for acts of "a political character."

10 Injured in U.S. Helicopter Crash

BENEDIKTBEUREN, West Germany (AP) — A U.S. Army helicopter from the clite 10th Special Forces unit crashed in the Bavarian Alps Tuesday, injuring all 10 American soldiers aboard, a U.S. military

Six soldiers were hospitalized; the four others received only minor injuries, a spokesman at U.S. Army Europe headquarters in Heidelberg said.

The UH-1 helicopter crashed on a slope of the 5,500-foot Benedikten Wall mountain, southwest of unit headquarters in Bad Toeltz, he said. Police said the helicopter grazed a tree and slammed into the mountain while trying to land during a training exercise.

French Fifth Republic Is 25 Years Old PARIS (Reuters) - France's Fifth Republic turned 25 years old Tuesday but French politicisms are still arguing about its constitution,

bequeathed to them by Charles de Gaulle.

The auniversary of the day the constitution of the Fifth Republic was promulgated in 1958 was ignored by President François Mitterrand and his Socialist government.

But the mayor of Paris, Jacques Chirac, leader of the conservative Rally for the Republic party and defender of the Gaullist faith, organized major celebrations at the City Hall, to the Socialists' embarrassment. Mr. Mitterrand turned down an invitation to attend, along with Prime Minister Pierre Maturoy.

Rightists, Police Clash at Paris March

PARIS (Reuters) — Rightist demonstrators hurled stones and fire-crackers at police early Tuesday after a peaceful protest march by France's leading white-collar union. Police fired water cannon at the

Several hundred rightists charged police lines during the march, organized by the union, known by its initials as CGC, to protest the

Socialist government's economic austerity program.

The rightists joined the march after a CGC rally. Police said that everal journalists were injured during the scuffles.

Japan Says Soviet Adds 3 SS-20 Bases

TOKYO (Renters) — The Soviet Union is building three new launch bases for its SS-20 medium-range nuclear missiles in the Soviet Far East, according to a Japanese Defense Ministry official.

Hirokazu Arai, the ministry's director-general for foreign relations, told a committee of the Diet, Japan's parliament, on Tuesday that each base would be capable of lamching nine missiles. The bases would increase the number of SS-20s in the Soviet Far East to 135 from 108, he

Mr. Arai did not give the location of the new bases. The Japanese Defense Ministry has said that the Soviet Union's 12 existing SS-20 bases in the region are sited in central Siberia and east of Lake Vikal. Japan has demanded the removal of the missiles, but the Soviet Union says they are needed to counter U.S. nuclear weapons in Asia and the Pacific.

Swedish Businessmen Stage Protest

STOCKHOLM (Combined Dispatches) - At least 75,000 people, many of them top businessmen, marched to the Riksdag, or parhament, on Tuesday in the biggest demonstration in Sweden in this century. Backed by the nonsocialist opposition, the marchers were protesting

the Social Democratic government's proposal to introduce union-run investment funds that would buy shares in Swedish companies. Many marchers said the funds represented only the first step toward an East European-style economy.:

Prime Minister Olof Palme, speaking in the Riksdag as it opened, said the funds were vital to increase investment and widen participation in industry. The funds are needed to strengthen production and employment at a time when financial operations and speculations threaten to undermine confidence in our economic system," he said.

For the Record

White emigration from Zambabwe was higher in July than at almost any time since independence when a majority black government took office three years ago, according to official figures published in Harare, the capital, on Tuesday. A total of 1,420 people left the country in July, 545 more than the previous month. (AP)

Italian authorities ordered the evacuation of several streets in the seaside town of Pozzuoli on Tuesday after an earthquake caused cracks to appear in buildings. (Reuters)

Five Central American nations are ready to sign a nonaggression treaty that would have each of them expel all foreign military advisers, Foreign Minister Rodrigo LLoreda of Colombia said in newspaper reports published Tuesday in Bogota. He said Nicaragua, Honduras, Costa Rica, El Salvador and Guatemala are ready to sign the pact, drawn up Sept. 9 during a meeting of the Contadora group of Colombia, Mexico, Venezuela and Panama. (AP)

Gas Stations Change or Die As Oil Companies Retrench

and the companies first began planning cutbacks in the early

Then the energy crisis arrived, bringing government regulations and fuel allocation systems that locked them into all existing loca-

"When controls ended in January 1981," said Jim Fair, a spokesman for Amoco here, "we all said, Hey, now's our chance to get out of some of these places.' Now, be-

ing in 48 states doesn't matter as much as being profitable in the states you are in." Since 1981, Amoco has cut down service pun from 20,100 stations in 44 states to 17,800 stations in 33 states. This year Gulf Oil is closing 485 stations in New York, 72 in Vermont, 259 in Michigan and 45 in

the East and Southern coasts. Mobil, which had 23,500 stations in 48 states 10 years ago, now operates 16,200 in 40 states.

Robert Lynch, executive vice resident of New York's 500-member Empire State Petroleum Asso-ciation, said the hardship for jobbers has worsened because many had made substantial capital investments in trucks, storage terminals and gas stations.

Of course, not every jobber is left without a major supplier. Some smaller oil companies move in to snap up the better locations and

Sunoco, for example, has moved.

(Continued from Page 1) into some areas of upstate New York that Texaco and others left. Besides leaving some areas, a number of oil companies are radically changing the stations where they remain. Atlantic Richfield out its stations from 6,000 in 30 states

to 2,300 in 17 states. To meet the decline in oil quality and the increase in price consciousness, Areo spent \$800 million up-grading its refineries to process the cheaper crude oil containing more sulfur. It also dropped all credit cards last year and then had a sudden sales spurt.

The company built 750 24-hour. convenience stores next to its self-

We had to have a cashier for the gas anyway," said George Bahi-kian, Arco's senior marketing vice president, "so he might as well be ringing up bread and milk too. Now they've secome the single most profitable program in our de-Ohio, leaving it with slightly more than 14,000 stations in 28 states on

Arco found that gas customers also bought groceries and that those who stopped for food also bought fuel. Last month each such station had average gas sales of 170,000 gallons. Ten years ago Arco stations averaged 27,000 gallons a month. The industry average today is around 50,000.

today is around 50,000.
"We're doing more business to-day at 2,300 stations than we did 10 years ago at 6,000," Mr. Babikism

said.

Arco has designed a computer model jugging 30 factors such as traffic flow, area income and population density to help best locate

Nevertheless, 55 percent said pros and cons of the breathey did not favor subsidizing local asked for their opinions. shone rates so that everyone could afford to have a phone. Only

34 percent favored such subsidies. The survey of 1,587 people was taken in late September as Congress began work on legislation that would attempt to retain subsidies of local rates to maintain the 50-year-old policy of universal telephone service.

Gary L. Schmermund, division manager of public relations re-search for AT&T, said the result showing that people did not favor subsidies "certainly suggests to me that Congress doesn't have the support it thinks it does."

But Samuel A. Simon, executive director of the Telecommunications Research and Action Center. a consumer group, said the ques-tion about subsidies would have been answered differently if people knew that local rates were now being subsidized.

The widespread lack of understanding of the breakup stems per-haps from the complexity of the issue and from the fact that for decades, telephone service has been something that most Americans received from a single supplier and thought little about.

Mistrust of the breakup might stem from the fact that Americans are now satisfied with telephone service: about 83 percent of those surveyed said they were either very satisfied or somewhat satisfied.

In another question, all respondents were told something of the

"Some people say the reorganization will be a good thing because it will mean lower long-distance rates and more competition in making telephones," the question said. "Others say it will be bad because local charges will go up and the system was working well and didn't need to be changed."

Forty-five percent of the respondents said the reorganization did not sound like a good idea, while 31 percent said it did and 24 percent said they did not know.

Older people and those with lower incomes were generally more opposed to the reorganization than others. Those who said they understood the reorganization responded 55 percent to 34 percent that it was not a good idea. About one-third of those sur-

veyed said their last long-distance bill was for less than \$10, while 39 percent said it was from \$10 to \$40 and 25 percent said it was greater

The results would indicate that a majority of customers will not benefit from changes occurring in rate regulation that will lead to a reduction in long-distance bills of about 10.5 percent, combined with the addition of a flat fee on every bill of \$2 to \$4, depending on the state.
Only those with long-distance

bills greater than \$20, for example, in the case of a \$2 monthly charge, will save enough on long distance to offset the extra charge. About 55 percent responded

"no" to the question about phone rate subsidies, which was: "Do you think local telephone service is so necessary that it should be provided to people who cannot afford to pay for it, even if that means higher phone charges or higher taxes for

Those in rural areas, now among the biggest beneficiaries of subsi-dies, responded 61 percent to 28 percent against such subsidies. Those over 64 years of age and those with incomes of less than \$10,000 a year were about evenly

Asked about the importance of a telephone to them, 51 percent said it would be a "real hardship" to get along without a phone, while 37 percent said it would be "somewhat difficult" and 11 percent said it would be "easy." Those over 64, those with college degrees and those with high incomes were more likely than others to answer that

living without a phone would be a real hardship.

Nevertheless, 42 percent said they would drop phone service if local rates doubled. Of those with annual incomes under \$10,000, 72 percent said they could not afford to keep a phone.

U.S., Europe Cut Afghan Map Project

WASHINGTON - The U.S. and European space agencies have the lacanceled a plan to take mapping photographs of Afghanistan on the next flight of the U.S. space shuttle day. because of the shooting down last month of a South Korean airliner

Reagan Says He Will Sign President Reagan said Tuesday by the Soviet Union.

The decision to "delete" the experiment was made jointly by NASA and the European Space Agency, which built the \$1-billion Spacelab that will make its first flight in the cargo bay of the space shuttle Columbia.

Spacelab is scheduled to leave Cape Canaveral Oct. 28.

Spacelab would carry a camera to take cartographic pictures, the ESA Spacelab director, Dai Shapland, said Monday at a news conference in Houston. "One of these targets was to have been Afghanistan, which we have now suppressed because of the Korean airline incident."

Mr. Shapland refused to say how the decision was reached or whether the Soviet occupation of much of Afghanistan had anything to do with it. U.S. space officials at the same news conference declined comment.

Warsaw Pact to Meet in Solia

MOSCOW - The foreign ministers of the seven Warsaw Pact states will meet in Sofia in mid-October, Pravda said Tuesday.

Liberal Senator Lectures on Church and State at Fundamentalist Campus "There is no morality in the mushroom cloud," he said. Mr. Kennedy spoke at Liberty Baptist College, the education arm of the Thomas Ruad Baptist Church, where Mr. Falwell preach-

> Young Americans for Freedom, which claims to be the largest in the country with 270 students, this week distributed 600 leaflets outlining Mr. Kennedy's record on such issues as abortion, the nuclear freeze and homosexual rights.

> "Kennedy represents everything that is wrong with American soci-ety," said the group's president, John Pyle, 22. "He is the antithesis of good government, constitutional government and the Judeo-Christian ethic. He is everything people look to when they point to the lib-

Mr. Kennedy's appearance at Liberty Baptist College was some-what of a fluke. Several months ago, it was reported that the sena-tor had mistakenly received a Moral Majority membership card in the

That prompted a letter to the senator from Cal Thomas, a vice president of Moral Majority, urging him to keep the card and to stop by for a "50-cent tour" of the college if he was ever in the area, according to Mr. Kennedy's aides. "It was a very breezy, light letter," said Melody Miller, assistant press secretary to the senator, who she said "wrote back that he would be delighted, and while he was there, would like to speak. They fell off their chairs, gulped and said okay."

Washington Post Service Mr. Kennedy was brought to Lynchburg in Mr. Falwell's private plane and dined at his home before the speech. The senator's appearance was billed as the first half of a "liberal-conservative" debate, with Representative Jack Kemp, Republican of New York, invited to speak for the conservative side. His address will not be until next month, however,

Laying out his standards for dividing religious beliefs and public policy, Mr. Kennedy took a jab at President Ronald Reagan, who, Mr. Kennedy said, told an evangelical gathering in Dallas that he endorsed their efforts. "To many Americans, that pledge was a sign and a symbol of a dangerous breakdown in the separation of church and state," Mr. Kennedy said.

Helms Holds Up Senate's Action On King Holiday

WASHINGTON - Senator Jes

se Helms, Republican of North Carolina, charging that the Rev. Martin Luther King Jr. espoused "action-oriented Marxism" and temporarily blocked Senate action on a House-passed bill to create a new national holiday in memory of the slain civil rights leader.

Mr. Helms's assault on King Monday, which prompted a scath-ing reply by Senator Edward M. Kennedy, Democrat of Massachusetts, came as the White House indicated that President Ronald Reagan intended to sign the measure, even though the administration once had opposed it.

Mr. Helms had hardly begun his

attack on the bill when Senate leaders of both parties, including Senator Strom Thurmond, Republican of South Carolina, the conservative chairman of the Judiciary Committee, filed a cloture petition to shut off debate and bring the bill to a vote, perhaps as early as Wednes-

Although Mr. Helms's colleagues had expected his effort to derail the bill by sending it to committee for hearings, the tone of his attack, linking King to what be called "the official policy of communism," appeared to take them by surprise. "I will not dignify [Mr. Helms's comments] with a reply. They do not reflect credit on this body," Mr. Kennedy said, adding that what Mr. Helms said should be "shunned by the American people, including the citizens of his own

The bill, approved 338 to 90 in the House two months ago, would set aside the third Monday in January as the 10th official federal holi-

President Reagan said Tuesday he was sure the Senate would approve the King holiday measure and that be would sign it, United Press International reported.

'Self-Interest' Appeals Criticized by Reagan

By David Hoffman

WASHINGTON - President Ronald Reagan, speaking two days after the AFL-CIO leadership enof the future." dorsed Walter F. Mondale for the Democratic presidential nomination, has said Americans do not want a leader who appeals to "narrow self-interest" or serves as a "broker of parochial concerns."

In a speech celebrating the rise of conservatism and the 10th anniversary of the Heritage Foundation, Mr. Reagan said Monday that voters "know the future of freedom depends not on 'what's in it for me,'
but on the ethic of what's good for this country."

Without mentioning Mr. Mondale directly, Mr. Reagan said "many people in the power struc-ture of our capital think that appealing to someone's narrow selfinterest is the best way to appeal to the American people as a whole. And that's where they're wrong."

He said voters would rather have political leaders committed to a "sense of shared values" and added that "they do not want a president

who is a broker of parochial con-

He said Americans "want a definition of national purpose, a vision

Former Vice President Mondale won endorsements last week from the National Education Association, the nation's largest teachers union, and the AFL-CIO general board. He also won a straw poll of Democrats in Maine.

Appearing at a dinner given by the Heritage Foundation, a conser-vative public policy research organization, Mr. Reagan semed to be warming to the prospect of a Mondale challenge, reminding his andi-ence of several episodes from the Carter presidency.

The president recalled thermostat controls during the energy crisis: the "days of national malaise," a reference to Mr. Carter's "malaise" speech in July 1979; the taking of hostages by Iran; the Soviet intervention in Afghanistan in December 1979; and Mr. Carter's 1976 campaign statement suggesting that Americans suffered from an "inordinate fear of commu-

Pentagon to Increase **Its Computer Security**

By Michael Schrage Washington Post Service

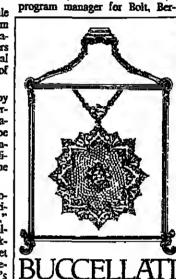

WASHINGTON - Driven by increased concerns for computer security, the Defense Department has ordered the separation of the nation's oldest and largest computer network into civilian and mili-

The move is a key part in the Pentagon's five-year plan to create its own Defense Data Network to carry electronic mail, computer programs and top-secret military nformation on a network that is secure and could be operational after a nuclear attack.

The old network, created 15 years ago by the Defense Advanced Research Projects Agency, which oversees technology development for the Pentagon, was set up as an experiment to link universities doing agency research. But it has developed into a computer communications service used by military laboratories, national laboratories and intelligence agencies as well as

The network links the various researchers by using 'packetswitching" technology. Informa-tion is divided into individual units called packets and shuffled through the network by a series of computer links known as "intelligent nodes" until it reaches its des-tination. Even if several of the nodes were destroyed, the others would be able to take their place to route the information. The network now has more than 100 nodes and handles more than 20 million packets a day.

It got to be such a good thing that it has really become the Defense Department's public computer network," said James Herman, a

Paris, 4 Place Vendôme

New York, 725 Fifth Avenue

Monte-Carlo, Tokyo, Hong Kong Head-office: Milan, Via L. Mancini

pany that helped design the net-

Concern has been expressed however, over the possibility that university computer aficianados who like to break into computer systems have tapped into the network to gain access to the Community Online Intelligence Network System, which is used by the topsecret National Security Agency

and other agencies. Although Donald C. Latham, an undersecretary of defense, denied that any break-in had occurred, he indicated that splitting the network would minimize any chance of unauthorized access into sensitive computer systems.

Mr. Latham said that effective Monday, the network will become two networks. One will be used for military communications; the tither will be used for further research in computer networking. There will be "mail bridges" between the two, according to Mr. Herman of Bolt Beranek and Newman, but the networks are designed to be indepen-

A Message to Manila

President Reagan calls it only a postpone- America, the less convincing he has been. His ment caused by the press of business in Con-gress, but be has reached the right decision: to cancel next month's visit to Manila. The ugly murder of Benigno Aquino, the political foe of President Marcos, is still far from properly explained. Mr. Reagan had no business em-bracing the embattled dictator or involving himself in any other way in his struggle with a newly aroused opposition. It is simple prudence to stay away — and good diplomacy to drop Thailand and Indonesia from the itinerary as well. By not singling out the Philippines, Mr. Reagan avoids any responsibility for compounding Mr. Marcos's difficulties.

Whatever the pretext, Mr. Reagan's absence will convey a desirable message. The more Mr. Marcos has tried to explain away the murder of his rival as he was returning from asylum in

own commission of inquiry has all but col-lapsed. Demonstrations of opposition have now been seen even among his once-ardent

supporters in Manila's financial district.
With the help of a loyal army, and for lack of a clear alternative, Mr. Marcos may ride out this most serious challenge in 17 years. What he cannot easily recover is his moral authority. And it is not for Americans to bestow it.

The United States's two vital bases in the Philippines and its historic obligations to that country require it to avoid taking sides in the evolving civil strife. These interests also require pressing Mr. Marcos to re-establish democracy before the violence spreads and plays into the hands of radical extremists. Mr. Reagan's cancellation is a good way to begin.

-THE NEW YORK TIMES.

Enter Neil Kinnock

The line between principle and perversity is not always distinct. In the face of endless warnings of trouble, Britain's Labor Party set its course resolutely leftward, and in the elections last June it was defeated, severely and predictably. Now it has reconfirmed that earlier decision by electing as its leader Neil Kin-

nock, the spirited spokesman of its left wing.

It is astonishing to think that the party that ruled Britain less than five years ago must now struggle to stay ahead of the Liberal-Social Democratic alliance for second place. But the internal doctrinal troubles of the British left are less interesting than the deep changes in the country undermining the labor movement

on which the Labor Party is built. In the past 10 years employment in British manufacturing has dropped 30 percent. It is true that Britain has just been through a long and severe recession, but the recession hardly begins to explain the erosion of its industry during the decade. British steel production, declining steadily, is now about half of the 1973 level. Antomobile production is about half of the 1973 level. Ten years ago just over one-fourth of the cars sold in Britain were imported; currently well over half of them are. Machine tools are a cyclical industry, but in Britain the cycle has been tilted sharply down-

ward; current orders are one-fifth of the 1973 number. Shipbuilding, everywhere a stricken industry, is running at one-sixth of the 1973 volume. Increasingly, Britain buys its manufactured goods from other countries.

The past decade has not been a good period for labor unions in Britain - or in the United States, or in most other industrial countries. The conventional explanation is that high unemployment has undercut union organization. But that is not convincing. In Britain the Labor Party first came to power, nearly 60

years ago, in a time of high unemployment. Another possible explanation is that in most industrial countries, and nowhere more successfully than in Britain, the state has assumed too well the responsibility for people's economic security, just as the unions demanded. Perhaps in Britain the Labor Party has very effectively worked itself out of a job and left itself with nothing to talk about but issues that most British voters seem to regard as slightly lunatic. You will notice that the Conservative government under Mrs. Thatcher has done very little to diminish the welfare state. That threatens to leave the Labor Party with little but the virtue of consistency, as it doggedly marches off in unpromising directions.

-THE WASHINGTON POST.

Other Opinion

Censorship in America?

During its two and a half years the Reagan administration has betrayed fear of free speech and has sought to close access to information, The pattern is clear.

The government recently barred entry into the country to Ruben Zamora, a Salvadoran leftist who was scheduled to address the World Affairs Council of Riverside, California, Two days later the State Department denied entry to five Nicaraguans, including the president of that country's Supreme Court.

Previously the government barred a visit by Julio Garcia Espinosa, deputy cultural minister of Cuba, who had been invited to a film festival in Los Angeles. The widow of the late President Salvadore Allende of Chile was denied a visa for a speaking tour in California. And spokesmen for Protestant and Catholic factions in Northern Ireland were refused per-

mission to enter the country to speak. The government ruled that three films produced by the National Film Board of Canada, must be labeled as "political propaganda" if circulated in the United States. Two are about acid rain and the third, "If You Love This Planet," is about the dangers of nuclear war.

A presidential directive issued last March requires all officials with access to classified data to submit to pre-publication review anything they write - not only while they are in office but for the rest of their lives.

The implications are ominous. High officials of one administration cannot criticize the security-related policies of a succeeding administration without submitting such criticism

to their successors for approval. - Phil Kerby in the Los Angeles Times.

The presidential directive intended to stop publication of foreign affairs and defense policy information unless it is approved for public release by the government is the most sweeping effort to censor government information since World War II.

When completely implemented it will require that some 100,000 government employees with access to classified information take he detector tests on pain of dismissal, sign nopublication agreements for books and magazine articles and report all contacts with the press. Government agencies are supposed to monitor all persons with access to classified information, to keep track of their telephone and person-to-person contacts with the press.

A number of civil liberties and press experts believe that the no-publication ban and the be detector tests may be unconstitutional, al-

though no law-uit has been filed yet. Despite strong opposition in newspaper editorials and from civil liberties groups, Mr. Reagan is moving ahead. And Congress - except in the case of lie detector tests — appears uninterested in stopping the censorship campaign.

-Jack C. Landau, executive director of the Reporters Committee for Freedom of the Press, in a commentary distributed by the Independent Press Service.

It is the left that is doing the real censoring in America. The tentacles of liberal censorship reach throughout the publishing industry. They touch so-called best seller lists, which take note of only a few best-selling books and ignore others. Special interest groups such as feminists, liberal blacks, homosexuals and, increasingly, nuclear freeze advocates are influencing the direction of textbook content. Book review editors and some librarians are also part of this new wave of censorship.

The few conservatives trying to ban books should stop and turn the censorship argument around and challenge liberals to out up or si up. We need to tell our liberal friends: "We'll take you on in the public arena with our ideas against your ideas. But please don't retreat into elitism by suggesting that our books aren't popular. They account for more than one-third of all commercial book sales in America."

— Cal Thomas, vice president for communications of the Moral Majority, writing in The New York Times.

People organize and seek to expunge the ideas and words they fear. Most of them, as it happens, are of the medium-to-hard right. But they are not the only ones.

All of this was quite thoroughly documented several years ago in "America Revised," a study by Frances Fitzgerald of the ways in which pressure groups attract the attention of writers, publishers and teachers of history.

Blacks pitch for greater emphasis on black accomplishments; feminists want more attention paid to the role of women; homosexuals want questions of "sexual preference" taken into consideration. Organizations use threats of political reprisal to scare a school board, and threats of boycott to scare a textbook publisher; the result has been an unscemly

scramble to alter the pages of history.

How this differs from the censorship practiced by the fundamentalists and right-wingers is difficult to discern. There are differences in style, of course, but none in substance.

- Jonathan Yardley, The Washington Post.

FROM OUR OCT. 5 PAGES, 75 AND 50 YEARS AGO

1908: In Praise of Concrete Roads

WORCESTER, Massachusetts — Captain Walter E. Hassam, inventor of the Hassam road, says experiments prove that concrete properly laid as a solid monolith comes the nearest of all methods to reaching an ideal road's requirements, and that reinforcement by wire mesh holds the paving so that it will not crack badly over soft places in the earth. As to whether such a road is practical for extensive building, Captain Hassam says it can be laid cheaper than any other known paving. He continued, "Our paving, being mineral, is impervious to water. Asphalt and other such products are vegetable products and deteriorate from the day they are laid."

tion of Chancellor Dollfuss has roused a strong echo of sympathy throughout Austria, and the outrage is greatly resented by the great majority, the questioning of Dertil continues. But except for the fact that his connections with the Nazi party have been established beyond doubt, hardly anything more has been brought to light. The police extended their investigation to the Nazis in Upper Austria, where Dertil's stepfather lives. Dertil asserted he shot Dr. Dollfuss not with the intention of killing him, but to direct the country's attention to his stepfather as "being the only man who can lead Austria to a brighter future."

Helping the Press Resist Governments

T ALLOIRES, France — Freedom of the press, which is essential to the freedom of people to be informed and to influence their fate, is under mounting siege. A study by the Interna-tional Press Institute showed that government controls and harassment increased substantially in most parts of the world last year.

In response, the watchdogs are beginning to see that they must bark not only when their own turf is threatened. They have to help strengthen each other's defenses.

That is the message from a conference of the World Press Freedom Committee just concluded here. It concerns much more than journalists.

Representatives of major publishing and broadcasting organizations from 25 countries in North and South America, Europe, Africa and

Asia met to discuss what they are doing about it and what more can be done. They argued a lot, in good democratic fashion, but they showed what a distorted view of the world emerges when only governments are heard.

The picture of the Third World is very differ-

ent from the one drawn at the United Nations, or

foreign aid; you can't give it to us. It's our freedom at stake, and we have to exercise it." Hear men from Peru and Uruguay, Kenya and Ghana, Barbados and Trimidad. They are not pleading for indulgence for young, undeveloped countries. They do not want double standards or patronizing deference to their nations' failings. They urge a universal standard, and they want it

and then we'll know better how to answer the attacks," said Cameron Doudo of Ghana.

professional ethics to co-workers.

the world, not many societies with a free press. But, as the Third World speakers pointed out, their influence is far greater than their numbers. the deforming interference of governments.

UNESCO, or the nonaligned movement. Hear Arun Shourie of India, who says, "Freedom isn't campaign to expand government controls on information under the guise of assuring peoples' "right to communicate," and the "responsibility" and "protection" of journalists.

For a long time the Western press paid little for the sake of their own societies, for the ad-

By Flora Lewis

vancement and protection of their own people They want and seek help, but it is to fight their own battles for their own rights. "We need the skills, the tools, the exposure to free societies,

At last, rich and powerful counterparts in the West are coming to recognize their own interest in providing support. There are some 300 private projects to belp train Third World journalists and technicians. It is a modest start, but it can have a snowballing effect as more trained people pass along their knowledge and their sense of

There are not many democratic countries in It is crucial that it be used in direct ways, without

This sense of common concern, of a need for mutual effort, is relatively new. It has arisen largely because UNESCO has been pressing a

attention. But there is a growing recognition that the defense of freedom is too important to be left to diplomats and soldiers. No matter what else they light about, most governments have a mutu-

al interest in silencing critics and asserting a claim to monopolize the voice of their people. That is why other voices - Voices of Free-

dom," as the Talloires conference was called --need to join in shouts loud enough not to be ignored. The news media have the prime respon-

bility, but the issue affects all citizens.

There has been a tendency to consider the ever-ending battles for press freedom as a kind of special-interest fight, a self-serving claim to privilege from one more commercial industry, alongside oil or sugar or automobiles.

This is in part the fault of the media, which do try to defend their profits but do not always explain their purpose. Commercial survival is the condition of the service of freedom. The U.S. Constitution provides that the government shall make no law abridging the freedom. of speech, or of the press" - not for the protection of journalists but of everyone.

Now it is apparent that Americans have an immediate stake in buttressing the ability of people in other countries to assert the same rights. Their success will play a large part in determining whether the United States finds itself living with a predominantly antagonistic Third World or in a beneficial partnership.

This is above all the job of the independent media. They owe political and moral support, and also technical and educational assistance, to and also technical and emicational assistance, in the tens of thousands who are struggling to drown out shrill officialdom with the message, as a Talloires participant put it, that "Third World governments are not the same as the people."

The New York Times.

It Can Look Like a Trend To Eliminate the Elderly

By Jack Levin and Arnold Arluke

BOSTON —Society may be headb ing toward a de facto "final solution" to the problem of a growing elderly population. Might the elderly one day be exterminated in America as a matter of law?

It is inconceivable that older people would be rounded up, carted off and killed. It is hard to imagine that retirement communities and nursing homes could become the concentration camps of the future. It may never happen — at least, not deliberately. Yet there is strong evidence that in-creasing numbers of frail, disabled and financially dependent elders are even now, as a result of America's social policies, being isolated from

society and dying prematurely.

The "need" to get rid of the aged has economic roots. The growing el-derly population is widely regarded as a threat to the U.S. national budget. David B. Wilson, a Boston Globe columnist, has argued that the increasing presence of dependent elder-ly people is likely to "blight the experience of the young and mature."

A final solution might gain support from prolonged high levels of unem-ployment that worsen the competition for jobs between young and old, and from demographic changes that will have fewer young people in the work force supporting the swelling numbers of dependent elders. A de facto mass extermination

may already be taking place. Many elders suffer a social death in which

of exposure to the candidates.

they are removed from the mainstream of life. They are forced by law or custom to retire, give up leadership positions in their communities and become virtual prisoners in their homes for fear of imagers and other criminals. Increasing numbers of elders live in age-segregated housing or nursing homes, where many are drugged into dependent states.

Isolation often leads directly to death. The highest rate of suicide is among recently retired men over 65. Some researchers say transplanting elders to nursing homes or retirement communities shortens their lives. Elders are deprived of the food,

shelter and health care needed to survive. The Reagan administration's 1984 budget proposes life-threatening reductions in Social Security, Medicare, Medicaid, nutrition and housing, imperiling the welfare of millions of elderly people. The National Council on Aging

says programs such as food stamps, Medicare and Supplemental Security Income have been slashed by 28 percent under the Reagan administration. Proposed budget cuts for 1984 would raise that figure to 40 percent.

The intellectual justification for a

final solution can be observed in changing attitudes toward aging and death. Self-help manuals are showing the elderly how to commit suicide. Studies show that emergency room personnel tend to spend less time and effort to resuscitate elderly heart at-

Iknow_Iknow_

but I do dress

better than he

ever did_

tack victims than their younger counterparts. There is a growing tendency in medical circles to emphasize quality over quantity of life. "Death with dignity" may in some cases be a cuphemism for extermination.

Films and literature have anticipated the final solution. In the science-fiction movie "Logan's Run," Michael York plays the role of a 30year-old man of the future whose age marks him for execution by the state. The book "Triage" conjectures that the government would solve the problems of old age by burning all nursing homes and their inhabitants.

This would not be the first time that societies have allowed the elderly to die. In many preliterate cultures, sick and dependent elderly people were cast out of their homes, starved, stoned, buried alive or deserted. A historical precedent for mass ex-

termination can be found in the master plan of the Third Reich. Accord- ment to The New York Times.

First of all.

Florida is

not really

in the South

ing to the historian Paul Bookbinder, Hitler proposed to exterminate many elderly people, regardless of their re-ligious or ethnic backgrounds.

In the past, scientific ideas have served as a basis for prolonging life and improving health, but Hitler's scientists justified his "final solution" on the basis of physical anthropology that purported to demonstrate the need for racial purity. Today's biology, psychology, sociology and even gerontology describe old age as a period of deterioration or decline. Could today's scientific thought be used to justify de jure extermination of the elderly in the future?

Jack Levin is professor, and Arnold Arluke is assistant professor, of socio-logy at Northeastern University in Boston. Mr. Levin wrote "Ageism: Prejudice and Discrimination Against the Elderly." They contributed this com-

The idea that Mr. Glenn is ducking

Linkage Is Dangerous Regarding "Reagan's 'Snarting De-tente' Won't Faxe Andropov" (IHT,

movements drove Mr. Reagan to the bargaining table last year, reminding the entire world — although apparently not America's far right — that arms talks serve the interests of all nations and should not be used as a political tool by one.) ment for linkage is based on a skewed

Mr. Safire's contention that the West can influence Soviet behavior with economic sanctions is also historically suspect. With precedents
such as the U.S. grain embargo — it
was, in Mr. Safire's own words,
"promptly undercut by France, Canada and Argentina" — there is little
reason to believe that the United
States could give myster the clock. States could ever muster the global anti-Soviet consensus that successful sanctions would require.

(Ironically, again, this is particu-larly true under President Reagan, whose scarcely manced bipolar view of the world lessens the propensity of many nations to distinguish between the Soviet Union and America.) Mr. Safire's conclusion that dan-

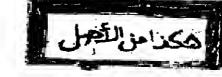

gerous episodes in future Soviet-American relations "could be averted now by the quiet, measured applica-tion of [American] strength" amounts to wishful thinking. Detente may not have discouraged the Soviet Union's incorrigible behavior, but neither did decades of Cold Warriorism, the decades of Cold Warriorism, the fore-bearer of the linkage esponsed by America's New Right.

Moreover, recent experience suggests that the Soviet Union is a paranoid superpower, able and willing to meet every Western threat with counter-threat, every Western pres-sure to conform to the international norms with blatant defiance of them. Linkage, in this light, seems the most

dangerous policy option.

How best to minimize the damage and defuse the danger wrought by inevitable Soviet misbehavior? That is the challenge — and the frustration — of sharing the world with a power one neither understands nor controls.

But during the early 1950s, when the U.S. involvement in Vietnam be-32102 gan to take shape, there were young American specialists who tried to point out that the period preceding World War II was a meaningless model for the later challenges in STATE OF THE PARTY the same of the same of the Southeast Asia. They were ignored.

About that time, too, the Asian section of the State Department was Appendig to the months of the rebuffed when its officials tried to explain that Ho Chi Minh, the head grander mad und in his street of the Vietnamese Communist move-20 ment, was primarily a nationalist. CENTER OF THE Evidence that all Communists were not alike was then apparent in the case of Marshal Tito, the Yugo-No. Committee of the Committee slav leader, who had defied the Russians. Ho Chi Minh showed similar SERVICE CONTRACTOR THE PARTY OF THE P

tendencies, yet no effort was made to explore or exploit them. Part of the reason was that the French were struggling to regain their colonial hold over Vietnam, and the United States was financing their war in order to get them to concede to the rearmament of West Germany. But France's crosade was a lost canse,

Leaders

Need

The Facts

By Stanley Karnow

WASHINGTON — Having re-cently completed several years of research on the Vietnam conflict,

after earlier spending two decades reporting on the region, I am impressed by a phenomenon that may be relevant to present-day crises.

It is that American presidents frequently reached decisions with al-

most total disregard for the realities

of the area concerned, even though they could have tapped expert

sources of knowledge and wisdom in

the State Department, the Pentagon, the Central intelligence Agency and other government bureaus. Blunders often stemmed less from lack of in-

formation than from reluctance to

To an alarming extent, leaders who charted America's course in Vietnam were guided by historical memories. Whether liberal or conservative.

those leaders were products of the 1930s who could not forget the fail-

ure of the democracies to stop the Nazis from taking the road to aggres-sion. They operated in the belief that

anything less than a firm stance in Southeast Asia would be a replay of

the Munich episode, in which Britain

Discussing the roots of the Victnam war, former Secretary of State

Dean Rusk told me about an evening in 1933 when, as a young Rhodes scholar, he attended a famous meet-

ing at Oxford at which the students

voted not to fight for king and country. That recollection, Mr. Rusk said, was one of his first lessons in the

shabbiness of appeasement. He said it taught him that the United States

had to be tough in Vietnam.

and France capitulated to Hitler.

rely on the available information.

and it collapsed in 1954. Other opportunities arose. The Soviet rulers who had succeeded Stalin appeared to be flexible. The Chinese ommunists, seeking better relations with the West, were also conciliatory. At the Geneva conference of 1954 they leaned on their Vietnamese com-

rades to compromise. It was principally under Soviet and Chinese pressure that the Vietnamese unists settled for a partitioned Vietnam. Not long afterward, the Russians came up with a proposal that might have changed the status of Vietnam and perhaps even averted the war. They suggested that North and South Vietnam be admitted to the United Nations as two separate states, thereby lending political legiti-macy to the division of Vietnam. The Eisenhower administration spurned the idea, since yielding any real estate to communism was unthinkable.

Once again, there were specialists in Washington who foresaw the growing split within the communist bloc. They urged that the United States adapt. But not until President Nixon took office did American forcign policy take advantage of the great communist breakup.

TV Series Re-examines Vietnam War

By Fox Butterfield New York Times Service

BOSTON — The United States' first television war is entering living rooms across the country again this week, as the Public Broadcasting Service begins an extraordinary 13-hour documentary oo the Vietnam war. Titled "Vietnam: A Television History," the series, which started in the United States Tuesday, is the most ambitious project ever undertaken by public television and required six years to complete. The second episode will be shown tonight. The subsequent 11 episodes, roughly chronological, end with the fall of Saigon on April 30, 1975.

They will be shown Tuesdays through Dec. 20. The result is a meticulously researched and carefully balanced, if sometimes bland, documentary that may broaden many Americans' understanding of Vietnam, if not change their opinion about the war that ravaged the Southeast Asian country from 1945 to 1975.

Both PBS and ABC initially contributed \$50,000 after Richard Ellison, the executive producer, and Stanley Karnow, a correspondent for The Washington Post and Time magazine, came up with the idea. The National Endowment for the Humanities also provided \$1 million, and eight foundations offered a total of \$285,000.

But the only corporate funding, a grant of \$350,000, came from the Chubb Group of Insurance Companies. Other companies that often sponsor programs on PBS, such as Mobil Oil and Exxon, turned the filmmakers down, Karoow said. "I think they were scared to get involved in something controversial," he said.

As a result, the producers worked out an arrangement whereby Britain's Central Independent Television produced four of the programs and France's Antenne-2 was responsible for two, almost half of the total. In return, the British and French are also showing versions. Ellison denied there were any serious differ-

ences in interpretation between the three national groups.

But another filmmaker involved in the series

said the British had taken a "more moralistic stance, anxious to accentuate the aspects of the war that were immoral at the expense of looking at it afresh."

The 13 episodes range from "Roots of a War," tracing the origins of the conflict back to Vietnam's 2,000 years of conflict with China, through the U.S. military buildup in the mid-1960s and finally the collapse of the Saigon regime in 1975. From the vantage of a correspondent who covered the war, the series, which cost nearly \$5 million to make, has something to offend, and please, both hawks and doves.

Some of the most revealing new insights are offered by Communist generals and former guerrillas whom a PBS camera team interviewed during three weeks of filming in Vietnam in 1981 (the trip took a year to arrange). They concede that North Vietnam began infiltrating regular army troops into the South in 1964, before President Lyndon B. Johnson dispatched the first U.S. ground forces to Vietnam in 1965. as the White House asserted at the time. They also confirm that for them the 1968 Tet offensive was a military failure, just as General William C. Westmoreland, commander of U.S. forces in Vietnam, claimed.

In perhaps the most powerful sequence in the

global circulation pattern, unique for an international newspaper. Its readership is broadly distributed.

near Da Nang is described alternately from the perspective of U.S. Marine troops and Vietnam-died, to the late 1960s. ese peasants. The fight itself was routine, just a company assault on a suspected Viet Cong hide-out. But it was also characteristic of the predica-ment U.S. troops often faced — barassed by suffire from sucrellas sheltered in a village gunfire from guerrillas sheltered in a village. For three days the Marines were pinned down

in a rice paddy outside the village by intense Communist fire. Their lieutenant was wounded It has something to

offend, and please, both hawks and doves. along with two-thirds of their patrol, they went

without food, water or sleep, and it rained the whole time. Finally, with air strikes and artillery support, they stormed the village. Some peas-ants were killed in the attack, but how? In 1981, when the PBS crew visited the village

with Communist cadres as guides, the peasants charged that the Marines had committed an atrocity, like the My Lai massacre. "There were only women and children around then and we didn't know where the VC

were," says Nguyen Bay, a young man who had been in the fourth grade at the time. "But they shot us anyway," Bay contends. "Some of the wounded people went to their beds to lie down. The soldiers shot their ears, then their stomachs," he adds.

But Jack Hill, a former Marine private, remembers it differently. "I didn't shoot any old ladies and kids," be says. Still, Hill admits, "After three days of blood and guts in the mud, you can't take it." Some of the men in his squad "did what they had to do" to try to find the Viet Cong in the village. "The way I seen it, it was

The effect of this vignette is like "Rashomon," the 1951 film by the Japanese director Akira Kurosawa, which leaves the viewer to decide which version of a story about a rapemurder is true.

To Ellison, the executive producer of the series, that is what he intended. "I think the story we are trying to tell has some innate ambiguities," he said.

Instead of relying on a narrator to carry the films, Ellison, a 59-year-old independent pro-ducer who has worked for CBS as well as PBS, chose to let the actual participants tell their own stories as much as possible

Hence, most of the film is documentary material intercut with interviews filmed over the last three years. In one of the most dramatic moments in the series, Harry McPherson, President Johnson's speechwriter, recalls in an interview how the White House was affected during the Tet offensive when the pictures shown on the evening news differed from the optimistic reassurances cabled from Saigon by Westmoreland.

Suddenly the program cuts to the now-famous film of Saigon's police chief, Brigadier General Nguyen Ngoc Loan, executing a Viet Cong guerrilla with a pistol shot to the head. We could have had a narrator telling you

what to think, that's the easy way," said Karnow, who served as chief correspondent for the entire documentary series, a battle for a village production. Karnow covered the war in Viet- hide and I can't make it stop."

Our Biggest Market

.: Is 30,000 Feet Up.

THE THE PARTY

"But it's not the adult way," added Karnow, detail than the television program can offer.
"We wanted to make the audience think and draw their own conclusion," he said.

To locate accurate footage, the producers assembled a team of 10 film editors and researchers who scoured 70 archives around the world, collecting more than 100 hours of film, including 1,800 television news stories from U.S. and foreign networks.

The two most important sources were the Sherman Grinberg Film Libraries in New York, where ABC News footage is stored, including outtakes not used on the air, and the U.S. Armed Forces Film Depository at Norton Air Force Base in California. But the editors also secured film from Hanoi, France, Britain, Japan

To supplement this archival film, the producers conducted 300 interviews, including 100 in Vietnam. Almost everyone asked consented, except former Secretary of Defense Robert S. McNamara, Nguyen Van Thieu, South Vietnam's leader from 1967 to 1975, and Le Duc Tho, the Communist leader who negotiated the Paris Peace accords signed in 1973.

Some bit players on the larger stage of history add a marvelous sense of the era, like Major Archimedes L.A. Patti, an operative with the Office of Strategic Services, who met Ho Chi Minh in 1945. Patti was assigned to enlist Ho's help in rescuing downed American Iliers in Vietnam from the Japanese, and after several talks with Ho, he was convinced the Vietnamese leader could be pro-American. "We had Ho Chi Minh in our hands," he recalls on camera.

One of the most revealing interviews is with Clark Clifford, the suave Washington lawyer whom Johnson named secretary of defense in early 1968. Johnson figured him for a hawk and appointed him to decide on the Pentagon's request for 206,000 additional troops after the Tet offensive.

For three days, Clifford recollects, he met with the Joint Chiefs of Staff in a crisis-like setting. "We had long talks," he says. "How long would it take? They didn't know. How many more troops would it take? They didn't know. Would 206,000 answer the demand? They didn't know. Might there be more? Yes. So, when it was all over, I said, What is the plan to win the war in Vietnam?" The only plan was attrition, to wear out the North Vietnamese, and the generals conceded that wasn't working either, he recalls.

So, Clifford reversed course and began pushing Johnson to de-escalate, eventually leading to Johnson's decision on March 31, 1968, to stop ican dramatist of the 1930s that the bombing of North Vietnam and oot run again for president. It was the beginning of the end of the war.

Johnson emerges as a more sympathetic and tragic figure, not just the grand manipulator from the Alamo. Bill Moyers, then a Johnson aide, remembers in the documentary the presitelling him as the escalation started in 1965, "I feel like a hitchhiker caught in a hailstorm on a Texas highway. I can't run, I can't

Lagerfeld's Fendi Collection Is Light and Gay

By Hebe Dorsey International Herald Tribune

MILAN — Karl Lagerfeld's collection for Fendi Tuesday was the first shot of adrenalin on Milan runways. It may also be a landmark for the Paris designer, whose contract with the French bouse of Chloé expires at the end of this year. Designing in Paris and Rome, he now is based in Monte Carlo for tax reasons.

His 12-year association with Fendi has been in furs and highly prestigious as well as profitable. Now, he is strengthening his position with this Roman house. Once only a brief wink at summer styles, this collection has been upgraded by Lagerfeld into a major, serious and variegated one. The audience's response was enthusiastic, but Lagerfeld, who had arranged every detail behind the scenes, had already left for Monte Carlo by private jet, letting Anna and Carla Fendi take the bows. While the Fendi ready-to-wear is now to be taken seriously, it was touched by Lagerfeld's magic hand light and gay without being stuffy, and full of different options. For the first time. Lagerfeld showed evening gowns lete with small trains.

The collection was shown in a series of tableaux, each of them with a distinct theme. The overall feeling was, again, one of eleaimed at the yacht crowds, espetopped by star-studded terry robes. Just the thing to go from chic Monte Carlo hotels to the

The opener was a series of uniforms for Rome policewomen and part of a contest held by the city officials. The winner is yet to be announced, and Laura Riagiotti and Gucci are in the running. Still, Lagerfeld's costumes, niscent of the uniform look on Paris avant-garde runways last year, were good-looking enough to please any woman, give or take a little brass. At the end of this tablem, Lagerfeld brought out a policewomen with full guardian angers wings.

With a constant change of moods, this collection jumped from Bavarian peasant girl, with cate, if slightly coy, tiered and flounced skirts, to big-city career woman, in two-color silk suits and holding giant chutch bags. Beach styles included not only the nantical but a pretty pom-

pom, Pierrot look. All through the collection, Lagerfeld favored long skirts, including fresh and cool poplin chemises. One of the major assets of this collection is that it was clearly

about summer, with easy, comfortable and colorful styles. Another was the abundance of dresses, a distinct gap in Italian collections. These included some sophisticated silk sheaths, in vermicelli prints and breaking at the knees with lively knife pleats.

Details were on the playful side. They included chefs's hats and butler's aprons (the latter carried out even on suede evening dresses), big baskets of wheat held by the peasant girls who also wore Bavarian headresses and straw collars — plus a giant straw hat, so large that the model in a swimsuit wrapped herself totally

Other high-pitched collections Tuesday included Missoni and Complice, the latter designed by Claude Montana of Paris. Everybody loves a success story so everybody loved the Missonis, whose career spans two generations. Famous for imaginative yet easy knits, the Missonis showed against a background of about 30 television sets on which appeared, seconds in advance, a blow-up of the next design. They kept their basic shapes simple and short - dress with cardigan or skirt with twin set was the whole story. But the jacquard pattern, including some oew Mondrian blocks, a different play on stripes and linens printed in the Missonis' famous colors, are sure to sell fabulously. Professionalism, too, works for Missoni and the Italians as a whole - a trait that has endeared them to

United States, including Bonwit Teller and Brooks Brothers. Totally sold on the Italians, be and 90 percent in Italy.

At Complice's, the combination of Paris talent and Italian know-how worked well, even if the line is weaker and more commercial than the collection Montana shows in Paris.

Montana showed a number of looks, many based on faraway and exotic places, such as Africa for a safari look, Egypt for bare-midriff outfits and India for a lawn-and-croquet look. But his biggest success was an encore of his Paris navy officer look, which ended in a bride dressed as a navy admiral, followed by all kinds of cute military cadets.

Basically the look of next summer in Milan is shaping up — full, elongated tops firmly caught at the hips with wide leather belts

over long and slim skirts. Montana told the same story, with cropped pants and long skirts. The whole collection was immaculately put together and accessorized with neat leather trimmings including leather pom-

poms hanging out of bush hats. Earlier in the day, Andre Laug showed his summer line, which keeps selling year-in, year-out because it is couture without risks. Borrowing a bit here and a bit there, Laug has concocted his own brew — impeccably made clothes which last just as impec-cably. The best of this no-nonthe president of Allied Stores, Thomas M. Macioci, whose group controls 580 stores in the sense, no-story collection are the suits and column silk dresses, in said the group spends 10 percent ivory or ice-blue shades.

Two Excellent American Plays Reach London

By Sheridan Morley

ONDON -- Two great Ameri-can plays in a single London week ought to be a cause for some sort of celebration, and let's start it with the senior of the two. Clifford Odets, for my money the most powerful and heartbreaking Amer-

THE BRITISH STAGE

separated Eugene O'Neill from Arthur Miller and Tennessee Williams, has always had a rough time in England. His best play, "Golden Boy," is largely remembered as an undistinguished Sammiv Davis musical and even his "The Country Girl" (now in a hugely welcome revival at the Apollo, the first in 30 years of neglect) was originally mis-titled "Winter Journey" here because it was thought that London playgoers would otherwise think it was a modern-dress version of "The Country Wife."

When I first saw what was then "Winter Journey" in 1953 (all right, so I was 12. It's an impressionable

Admittedly then we had Michael you suddenly realize that she alone, know of the "Country Girl" is the Rederave as the old drunken actor and Sam Wanamaker as the young Kazan-type director determined to save him, if necessary from his own about. In this she's admittedly wife as well as the bottle. But even at that time, and in that wonderful production at the St James's, the an adequately butch juvenile lead, play was largely dismissed by the in no way suggests a great director British press with that same tone of at work, and John Stride as the faint academic patronage (like Ox-ford dons reviewing Indy Garland in "A Star Is Born") that I find to the essential feeling of a great lost my amazement creeping back even into the current reviews.

It was, as usual, Kenneth Tynan who got it right. Rather than another backstage weepie written by a man with delusions of poetry (the general gibe at Odets), Tynan not-ed that we had here "a play of unimpaired pungency and passion concluding that redemption is a compromise which no amount of idealism can achieve unaided."

tion and a new cast, and just as the true title has been restored to "The Country Girl," so too has its true balance: Hannah Gordon has pulled the play back from the men

her sacrifice of a life to get her husband back on the boards, is what Odets meant this play to be much helped by the undercasting around her: Martin Shaw, though actor, though marvelous in his prepast, so that you have to blink and look again when his performances

are spoken of in the same breath as Walter Huston's and Alfred Lunt's. Both he and Shaw are, quite simply, too young and too contemporary in their styles for what is being asked of them; the old actor doesn't have to be a Wolfit, but he does have to be a dried-out giant clambering back up the mountains he has once conquered, and with Stride there is no sense of that original climb. The director Robin

But now we have a new produc-Lefevre has indulged himself in some creaking scene changes to convey backstage life, but for Hannah Gordon, radiantly in tone with the full strength of this massively age. So is 42.) it struck me as the in her life to herself, and in her powerful play, the evening is an greatest backstage story of all time. outburst of early 1950s feminism unqualified triumph. If all you

In a sense, they are the last refugees of World War II. The Japanese call them Kimin — forsak-

'If I bad wings I would fly away," An Tae Sik wrote to his son in South Korea three years ago, shortly before his death. "But with only these feelings there is simply frustration. There is no

hope. There is nothing but to die here."

Mr. Park collects letters like this, piling them in neat stacks on the straw mats of his apartment, above a small grocery store that he and his wife run in the northern Tokyo neighborhood of Takenozuka. He heads an association seeking repatriation of the Sakhalin Koreans. One by one, in a careful hand, he has had to record the

deaths in the ledgers that he keeps.

New attention has been drawn to the plight of these Koreans because of the Korean Air Lines plane, with 269 people aboard, that was shot down over Sakhalin by the Russians on Sept. 1. Several days later, a United Nations subcommittee on human rights, meeting in Geneva, voted down a resolution calling for an investigation of the Sakhalin Koreans' problems. Among those rejecting the proposal was the Soviet

Times Are Tougher Now

Officials at the Japanese Foreign Ministry believe that, given the chilled diplomatic climate created by the airliner incident, the Koreans face a tougher time than ever in their efforts to

Japan controlled the southern half of the island, which it called Karafuto, from 1905 to 1945. Needing workers for the coal mines, pulp mills and farms, the Japanese conscripted laborers from Korea, which was then a colony. In those years the Koreans were technically Japanese citizens, an irony that turned grim for them

They lost that citizenship after the war. They

could not return to the newly created South allowed some to be repatriated to South Korea Korea because the Seoul government had no in the late 1940s. A decade later, exceptions relations with Moscow, and still does not. As non-Japanese, they could not be automatically repatriated to Japan, and the Tokyo government, under U.S. occupation until 1952, did not

intervene in their behalf. Thus, while several hundred thousand Japanese came home from Sakhalin, the Koreans were stranded.

Now and then, holes would open in the curtain that had fallen around them. The Russians

were also made for Sakhalin Koreans married to leave in 1958. The others remained, their children and

randchildren eventually accepting offers of Soviet or North Korean citizenship Most of the original Koreans remained

"stateless," although life has been bad for them. In fact, a member of the Diet, Japan's parlia-ment, Shozo Kusakawa, who was able to visit at Moscow for its adamance but also at Japan

Sakhalin in late July, said the Koreans might be better off than other citizens of the Soviet Union as the result of bonuses paid to workers in fiercely cold regions such as Sakhalin. Some have "established high social positions," Mr.

Anger at Moscow and Tokyo

Still, he said, the desire to return to Korea is

for what is perceived to be foot-dragging on a

situation that it created. Mr. Kusakawa told of a visit in August to the South Korean city of Taegn, from where many of the Sakhalin laborers were taken 40 years ago. "The women would shout, 'Return my husband!' he said. "They immediately got an-

In recent years, the Koreans' troubles have struck a responsive chord in Japan, the govern-ment has pressed their case more forcefully-Soviet officials agreed in 1975 to allow Sakhalin Koreans to leave if Japan would give them entry permits. So far, 411 of these permits have been ssued in Tokyo, but the Russians have let only

three persons go. According to Kusakawa, Soviet officials have told him they regard the matter as a domestic ernment, however, is under a certain amount of ressure to get more involved. Early this year, for example, the Japan Federation of Bar Associations urged a stronger government effort, perhaps by restoring Japanese citizenship to the Sakhalin Koreans to make repatriation possible.

That sort of tactic has been ruled out by the government, which believes that pushing Mos-cow too hard would backfire. A "step by step approach" is required, Kazuo Ogura, a senior Foreign Ministry official, argued. This might include reunion of the Koreans with their families, on a guarantee that they then return to

But for now, even that proposal is unlikely to get anywhere. And in his apartment above the grocery, surrounded by his papers and letters, Mr. Park worries that the clock is running down. Every few weeks brings word of yet another death of an original Sakhalin Korean. "Time," Mr. Park said, "will solve the problem." He suspects that is what the various governments

that the alorse. It is now of the "Commy Get Income of the "Commy Get I

> The man said that subsequent announcements, up to the Sept. 6 admission that the plane had been shot down, convinced them that a "terrible mistake" had been made by the Soviet armed forces and that Moscow was engaged in

an exercise in damage control. Reading Between the Lines

The man drew his conclusions in a familiar fashion, by reading between the lines of official statements, learning as much from what was not

A surprising number of other people learned the full story behind the incident by listening to Russian-language broadcasts from West Ger-many and Britain and from the Voice of Amerimany and Britain and from the Voice of America. Although the foreign broadcasts were heavily jammed, many Russians reported during the ardiner crisis that, as one man put it, "if you want to listen and keep searching the dial long enough, you'll get a signal."

Among end of the voice of America.

said as from what was.

Flight 007's passengers are little different from face ended the encounter. those heard in the West.

"It was horrible, just horrible," said one man. ion, conceded that he had aband "I mean, they actually shot down an airliner. It's matic demeanor. He explained:

Those voicing such comments said that the jet's deviation from its flight path needed clarifying, but there seemed little disposition to accept the official argument that the suspicion that the plane was on a spying mission justified shooting it down.

Many Backed Authorities

Against this, many other Russians, particularly those in blue-collar jobs, seemed content to accept the government's argument that the defense of the country's "sacred borders" outweighed the loss of life.

The number of casualties was officially mentioned only twice, in the government newspaper Ly sa Hart w Korean airmer; and that quite a mumber of Livestia and a Moscow paper, Sovetskaya Rossi ya. But even the death toll of 269 people failed

"I don't think that's so many, when you consider how many people died in the war," a typical comment.

Although Western envoys in Moscow baye abandoned any hope that Soviet officials will heed demands for an apology and for compen-sation for the casualties, diplomatic efforts to win Soviet cooperation in the affair continue almost every day.

But even when requests are presented in a manner designed to avoid the issue of blame, the Soviet Foreign Ministry has reacted in a peremptory fashion, refusing even to accept the notes on which the requests are put forward.

One ambassador whose nation had several citizens aboard the Korean plane went to the Foreign Ministry last week with a note listing the names and personal particulars of the victims, including passport numbers.

Among other things, the note asked that any human remains or belongings be returned to the country concerned, and requested that the Soviet authorities consider issuing provisional death certificates to speed up legal processes for the victims' families. A senior official of the ministry's consular department pushed the note

something of the human dimensions of this thing. I want you to imagine the scene aboard that aircraft as those people went to their watery graves, crying out for help and grasping for their loved ones. This is what occurred, and when you respond to us in this fashion it would be as well if you thought about it a little."

Another prominent Western ambassador has reacted by cutting off social contacts with Soviet officials, a decision that involved telling one group of guests that a dinner-dance had been canceled, then reinstituting the occasion, without them, as a dinner. The ambassador's wife has made her feelings known in another way. Since the airliner went down, she has dressed only in black on formal occasions

In putting its case before the Soviet public, the Kremlin showed something of its attitude toward the Western news media. In general, they are denounced in Moscow for "lies" and 'distortions," but after the airliner was shot down Tass and the principal newspapers reprinted dozens of items from Western papers in the effort to prove Moscow's case that the Kore-

Citations Out of Context

readers doubtful of the official government ac-erally considered impressive. count would be convinced when they saw what seemed to be support for the official version coming from The New York Times, The Washington Post and other newspapers in the West. But many of the citations were taken out of their context or otherwise doctored to distort their

For example, a long article that appeared in Pravda last week quoted triumphantly from a British television report to show that Britain's Civil Aviation Authority had run simulations and seemingly concluded that it was "an abso-inte impossibility" for the Korean plane to have deviated so far from its course as a result of crew

In fact, the British authority's investigation

He explained: computer-guided course, it could have ended up "I said to this bloke, "Listen to me, because five miles (eight kilometers) from where it was my government would like you to understand shot down.

> Perhaps the most illuminating example was a Tass item on Sept. 16 reporting that the Soviet Embassy in Camberra, Australia, had received a letter on the airliner incident from "the Australian pilot F. James with 46 years' seniority."

> Tass quoted Mr. James as saying that "a rowing number of pilots" were, like him, "intionant" at the Australian government's having been drawn into the "propaganda campaign of distorting facts" put out by Washington. What Tass did not mention was that Francis James is an elderly Australian maverick with leftist symathies whose flying experiences were in World

Glimpse at Inner Workings

The Korean airliner incident illuminated the Soviet system in many unexpected ways, mainly armed forces. For Western analysts, one bonus was the appearance at a two-hour press conference of Marshal Nikolai V. Ogarkov, the chief of the General Staff, who was previously to be glimpsed only on ceremonial occasions in Red

The calculation seemed to be that Soviet few diplomats, the marshal's demeanor was gen-

An engineer by training, he is perhaps the outstanding example of the new generation of technically skilled officers who were advanced rapidly under the leadership of Nikita S. Khrushchev, who believed that the armed forces needed a younger, more efficient general officer corps than the one that took over in the aftermath of World War II.

Now 65 and in his seventh year as the nation's top soldier, Marshal Ogarkov rose to the top on the strength of his skills as an overseer of weapons procurement and research programs.

At the press conference, he was every inch an eccomplished general staff officer, running through the Soviet version of the Korean plane's

The man identified by the Soviet Union as the pilot who shot down the South Korean airliner. While many middle-class Russians saw a "terrible mistake," many blue-collar workers thought he was defending their "sacred borders."

came from Western reporters.

defense of the nation's "sacred borders" was to be running high worth 269 lives, he responded calmly, as though a dry run at the general staff headquarters had

controversy," he emphasized. But perhaps even more notable than Mr. Greenberg's appointment is what he has accomplished since then.

In the last 18 months, he has won overwhelmwith paint and sawdust while renovating porching. The marketplace where slaves once were criminals and police abuse. Arrests have more than doubled while only one abuse complaint has been filed. There used to he half a dozen a

The police chief is always the hottest job in 4th, Charleston's first black police chief. He also town," Mr. Riley said. "But Greenberg has managed to become very popular here." Mr. Greenberg swung into action just three days after being sworn in on April 12.

An arrest in a housing project April 15 drew a given far more to irreverence than Southern handful of black pickets to City Hall protesting what they saw as an abuse of police authority. On Saturdays, Mr. Greenberg, 39, often can Mr. Greenberg investigated, upheld the arrest be found personally patrolling Charleston's but then suspended one of the two policement talking to a black citizen.

call someone in the project that, either. Everyone gets equal treatment.

The day after the incident, the chief gave each officer a thick manual he had written that spelled out how an officer is supposed to conduct himself in public. Most striking was General Order No. 4, regarding the use of force.

Force is to be regarded as an unusual procedure and an absolute last resort," it began. If an officer does use any manner of force, Mr. Greenberg's order continued, he must promptly report the incident in writing — regardless of whether the citizen lodges a com-

The department has received almost 400 reports from officers since the plan was implemented and only one citizen complaint.

Mr. Greenberg said he developed his policy when teaching at colleges ranging from California State University, Hayward, to the University of North Carolina. "I figured, why do people do things?" he said. "I realized that the morality of the individual is always better than the group. So by requiring these reports, I'm taking away an officer's anonymity and making him behave

as an individual. But at the same time Mr. Greenberg tackled police abuse, he signaled to the community that he planned to be no less aggressive against

When asked, he regularly expressed impa-tience with "all that psychological-sociological crap about criminals. The stuff that says they steal because they're deprived or have no job or are angry at society or their father. Bull. They steal because they want money. Besides, I don't care wby they steal. My job is to put them in

my men whether they'd do that to Senator size of the mounted patrol, tripled the number [Ernest F.] Hollings. No they wouldn't. So don't of foot patrols in high-crime districts, raised the call someone in the project that, either. Every-number of black officers to 32 percent of the department, assigned more police officers to duty during peak crime periods and established the city's first special weapons assault team.

Mr. Greenberg grew up in Houston during a time when there still were separate water foun-tains for blacks and whites. His Jewish grandfather spent 32 years in a common-law marriage with a black woman because Texas did not allow interracial marriages. Mr. Greenberg's father managed an insurance office and provided a middle-class upbringing for his six children. In the 1960s, Mr. Greenberg settled in San Francisco, earned a bachelor's degree in social

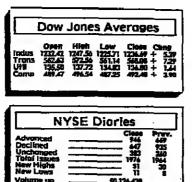

anthropology from San Francisco State Univer-

sity, a master's degree in city planning and a second master's in public administration from the University of California, Berkeley. He participated in civil rights demonstrations. "I started to talk to the cops across the picket lines, and I found out they were OK," he said "They didn't like what was going on, either, I came to see being a cop as a way to help people. I don't like to see anyone intimidated. The most important right is to dissent, not go along with

the program. The police's job is to protect that He applied for the Charleston job last year after stints as police chief of Opa-Locka, Florida; chief deputy of the Orange Co., Florida, sheriff's department, and deputy director of the Florida Department of Law Enforcement's divi-

sion of standards and training. Random talks with residents in Charleston show widespread appreciation of Mr. Greenberg. Less is made of his unique policies and colorful nature than of the sense that he works hard, is visible at the scene of crimes, is not "full

Investment Mortgage International Opens First Foreign Office in London Volume Up

-Investment Mortgage Interna-tional Inc., the San Franciscotiased real estate finance company, has opened its first overseas office in London, with Peter Richmond as

· To help Mr. Richmond open the offices. IMI sent a chartered Boeing 707 jet carrying a task force

of 32, led by the company's owner and charman, J. William Oldenburg.

Mr. Oldenburg, who was calling late meetings at 4 A.M. and working breakfasts at 8, said his company has closed business more home. my has closed business worth more than \$1.5 billion over the past year, with an average value per deal of

\$62.5 million. His approach, based on arranging consortium finance from savpension plans and insurance companies, enables large financing juckages to be pieced together while giving institutions the opportunity to spread their debt risk in tranches of \$2 million to \$10 million.

IMI also specializes in arranging deals quickly, by working simultaneously on origination, placement and closing.

Although London financial circles may need some convicing that IMI's methods will work in the European marketplace, Mr. Richmond has no

"We hope to place over \$10 billion in loans by the end of 1984 — and we feel that the London market will be a major factor in reaching that

Lloyds Bank Hires Hong Kong Chief

. Tim Williams has been named to head Lloyds Bank International's new area office in Hong Kong, which will develop and and coordinate business with China. Mr. Williams, a fluent Mandarin speaker with years of experience in financing major projects in China, joins the bank with

the title of area manager.

Mr. Williams will also be responsible for the Lloyds Bank representative office to be installed in the special economic zone at Shenzhen, just across the border from Hong Kong. This office is expected to play a major role in financing developments connected with China's offshore oilfields.

Other Appointments

Wolfgang H. Schwarz, the senior vice president of Security Pacific National Bank, has moved to London from the bank's Los Angeles headquarters. He will take over the European, Middle Eastern and African operations of Security Pacific's global financial institutions division. He succeeds Jerry Johnston, who has returned to Los Angeles.

Dr. Kenneth L. Ciles has been appointed director of research at Twyford Plant Laboratories, Britain's leading company in commercial plant propagation by tissue culture. Dr. Giles returns to join Twyford after more than 20 years in teaching and research positions in Canada, New Zealand and the United States. .. L. Verstoep has been appointed managing director, K.G. Bakkenist

director of personnel and organization, A. Bergsma director of finance and D. Vlot director of operations in a reshuffle at the Dutch company of Boskalis Westminster Baggeren. Boskalis Westminster is a subsidiary of Royal Boskalis Westminster, which has interests in dredging, construcfion, pipelines, offshore projects and agriculture.

R.F.B. Logan has been named the new group chief-executive of Grindlays Bank. Mr. Logan, currently senior vice president and chief financial officer of Continental Grain Co. in New York, moved there in in 1981 from Citibank, where he had been executive vice president in charge

Paul Buchman-Barrow and David Lough have been named directors of County Bank, while Peter Cartis, David Lowes, John Richardson and Oliver Pawle have been appointed senior assistant directors.

Anthony Thatcher, named managing director of Dowty Group's electronics division in July, has now joined the group's main board. Mr. Thatcher spent four years in the United States, from 1970 to 1974, as vice president for marketing of Ultra Electronics Inc. before returning to Britain as marketing manager of Ultra Electronics. Dowty bought the

BAT Industries has appointed A.C. Long, former president of BAT's Brazilian subsidiary, Souza Cruz Industria e Comercio, as its new finance director. Mr. Long has also joined the boards of BATUS Inc. and BAT Stores. E.J. Symons, deputy chairman and senior finance director of BAT industries, will retire in May 1984.

N.Y. Stocks Advance;

NEW YORK -- With IBM and railroad issues leading the way, the New York Stock Exchange snapped a five-day losing streak with a modest advance Tuesday,

Takeover situations sparked some action and automobile stocks showed a bit of life. But the overall market was trendless because investors remained nervous.

The Dow Jones industrial average, up 10 points at one time after shedding 1.83 Monday, added 5.39 to 1,236.69. ft had fallen 29.47 points the previous five sessions after hitting a record 1,260.77 Sept.

The Dow Jones transportation average of airlines, railroads and trucks jumped 7.29 to 568.08. The average had been battered the past reck because of problems in the airline industry.

Advances topped declines 3 to 2 as volume climbed to 90,270,000 shares from the 77,230,000 traded

"The rally was simply a bounce from recent losses," said Alan Shaw of Smith Barney, Harris Upham. "There are so many crosscurrents we are keeping our powder dry. It pays to sit back to find out what is going on if that is possible."

There are still a lot of interestrate and international jitters in this market," said Alan Ackerman of Hertzfeld & Stern. "But the market indicates people are looking for values over the long term."

Some traders were restrained by the rise in federal funds rates, the fee banks charge one another for overnight loans.

Also, investors were looking for some kind of credit policy signal from the Federal Reserve's Open Market Committee that opened a meeting in Washington on Tues-

SmithKline-Beckman was the most active Big Board issue, off 1% to 63% following a block of 1,763,200 shares at 63. The block was the third most valuable single transaction in NYSE recor.

The company has decided to go private in a buyout by Kohlberg, Kravis, Roberts & Co.

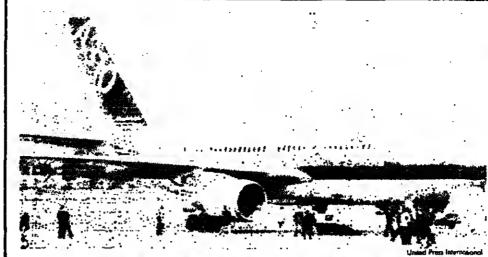

. Blue-chip IBM, rumored to be ready with its Peanut home computer, was the third most active sue, up 1% to 129%.

Texas Instruments rose 11/2 to 113% and Commodore Interna-tional 2 to 44%. Coleco lost 1% to 411/2. Computervision skidded 41/2 to 421/4 after Merrill Lynch lowered its 1983 and 1984 earnings estimates for the company.

21/2 to 541/4.

Trading in Harris Bankcorp remained suspending pending an announcement. The company schedule a news conference for Wednesday amid speculation it would accept a merger proposal from Bank of Montreal.

Citicorp lost 11/4 to 35 in heavy trading as a result of the Argentine

Airbus Sales Faltering Just as Push To Develop New Airliner Gears Up

New York Times Service

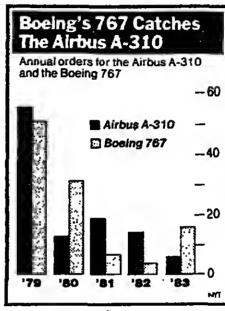

PARIS - The day before Japan Air Lines announced it was buying nine new Boeing 767 airliners for \$560 million, there were already long faces at Airbus Industrie headquarters in Tou-

That morning a week ago, a Japanese newspaper had released the story and by the time executives at Airbus Industrie, the company that assembles and markets the competing European Airbus, arrived at their desks, the company's Tokyo representative had already wired the ill tidings to them.

"Our offer was better, we're convinced of it."
Pierre Pailleret, director of Airbus sales, said in
and interview a few minutes after he read the telegram. But he added: "Of course we never really expected to get it. Japanese industry makes 15 percent of the 767 and it would be had publicity if JAL had ordered Airbus instead."

There was no doubting his disapointment, however. Thirteen years after Britain, France, West Germany and Spain set out to prevent the United States from acquiring a virtual monopoly of civilian airline construction hy jointly building the 200-seat, wide-bodied Airbus, sales of the new plane are faltering and may slip below the company's

Moreover, this is happening when Airbus executives want to widen their battle with the American producers. They are asking their governments to find another \$2 billion in taxpayers' money this year to finance development of a narrow-bodied,

150-seat Airbus, to be called the A-320, that would compete with other planes produced by Boeing and McDonnel Douglas, even though they have few orders for the smaller Airbus so far.

"We are absolutely convinced that the future

IEA Says Demand For Oil to Increase 7% in Final Quarter PARIS - World oil demand is market overcome the surplus. expected to rise 7 percent in the fourth quarter, mainly due to increased consumption by the major

industrialized countries, the laternational Energy Agency said Tues-

But an IEA official said that the agency's projections implied little scope for any increased output of crude oil by OPEC countries after a worldwide build-up of stocks durmana Said al-Oteiba, the oil minister of the United Arab Emirates, was quoted Tuesday as saying that oil producers may face a price col-lapse in 1984 if world stockpiles are no? reduced.

The IEA's latest projections, contained in its monthly Oil Market Report, assume improved economic growth, normal winter weather and lower prices after allowing for inflation.

The IEA said demand for the final three months of 1983 was expected to be 45.7 million barrels a day, up from 42.7 million harrels a day for the third quarter and 2 percent higher than for the comparable period last year.
For 1984 the IEA predicts a 2-

percent rise in world oil demand to 44.9 millions a day, compared with a 1983 demand projection of 44,1

million harrels a day.
Higher world oil supplies in the third quarter of 1983 were mainly due to an increased output of 18.1 million barrels per day by the Or-ganization of Oil Exporting Coun-tries, a rise of 1.5 million barrels a day from the April-June period, the

In an interview with the Arabiclanguage newspaper al-Share al-Awsat, published in Jeddah and in London, Mr. Oteiba also warned that excessive production by mem-bers of the Organization of Petroleum Exporting countries and oth-

er exporters would not help the

"If this continues into next year, especially the second quarter of 1984, OPEC will face the same price crash it faced earlier this year," he was quoted as saying.

The newspaper said that industrialized countries had built stocks of 3 three billion barrels, enough for three months' consumption.

It quoted Mr. Oteiba as saying that the large inventories would put pressure on the market and eventually affect the oil-pricing structure. He added, however: "Let it be

clear. OPEC will never allow another price crash and hopes all countries will benefit from our pre-Mr. Otciba also said that OPEC

is in the process of contacting non-OPEC members to explain the need for observing production ceilings and pricing, the newspaper said. It did not elaborate.

Bonn Reports Stagnant Output

BONN - West German industrial production was unchanged in August, but September employment figures showed a small improvement, the gov-emment reported Tuesday.

The leveling off in industrial output came after a revised 2.8percent drop in July. The Eco-nomics Ministry had originally estimated July's decline at 0.9

The Federal Labor Office in Nuremburg said unemployment in September fell to 8.6 percent of the workforce from 8.9 percent August. In September 1982, the jobless rate was 7.2 percent.

Congressional Housing Accord May Clear Way for IMF Bill By Clyde H. Farnsworth

New York Times Service

WASHINGTON — A House-Senate accord on housing legisla-tion may be the key to Congressio-nal approval of \$8.4 billion for the International Monetary Fund.

The House approved the additional U.S. subscription to the fund early in August in an uphill victory for the administration. But a House-Senate conference to meld the House and Senate bills has been delayed by other issues, namely the housing bill and the apology de-manded by House Democrats.

With administration encouragement, the House and Senate have begun negotiations on a housing authorization bill that has aroused strong philosophical objections from the Republican right because of the support it would provide for many forms of assisted housing. The House cleared a \$13.5-billion bill last July. David A. Stockman, director of the Office of Management and the Budget,

diately warned that it was

The exercise has the blessing of Treasury Secretary Donald T. Regan who told a closed door meeting of congressional leaders last Tuesday, according to those present, that it was a positive development.

The negotiations became known as the IMF held an executive board

Managing Director Jacques de

Larosière had frozen all new loans, even those on which staff work had been completed, as a result of the liquidity crisis. The board agreed Monday to provide funds to countries whose negotiations were already well advanced

The principal beneficiary, officials said, will be Portugal, which is to draw nearly \$500 million.

sents one of two major obstacles to the IMF financing bill. The other is the presidential apology that has been sought by some Democrats for press releases from the Republican Congressional Campaign Committee that attacked some Democratic supporters of the bill.

The Republican press releases accused the Democrats of "supporting Communism" because they bad voted against an amendmend, adopted by the House, that barred the IMF from making loans to "Communist dictatorhsips."

Mitsubishi Finance International Limited

Mitsubishi Finance International Limited has been formed in London as the major merchant banking subsidiary of The Mitsubishi Bank, Limited.

Mitsubishi Finance International Limited has taken over the role previously played by Mitsubishi Bank (Europe) S.A., Brussels, and will broaden the active participation played by The Mitsubishi Bank Group in the international capital markets.

> Mitsubishi Finance International Limited 6 Lombard Street, London EC3V 9AA. Telephone: 01-726 4500, Telex: 8954381 BISHFI G.

Mitsubishi Finance International Limited is a scholly owned subsidiary of

The Mitsubishi Bank, Limited.

Institute Expects Demand for Steel To Recover Modestly During 1984

VIENNA (AP) - Demand for steel should recover modestly next year, but painful cutbacks must still be made in the world's steel industry, the International Iron and Steel Institute said Tuesday.

After an expected 1.7 percent decline the year, steel demand in non-Communist nations should rise 6.1 percent in 1984 and will continue to grow for the rest of the decade, the Brussels-based trade group told its

But the growth in demand will be concentrated in developing nations, the institute said. The problem of overcapacity in most industrial nations will continue to worsen, it said.

uption in the non-Communist nations will fall to 394 illion metric tons this year from 401 million tons in 1982, the institute

Nippon Telegraph Deal Likely in U.S.

WASHINGTON (WP) - Nippon Telegraph and Telephone Co., the iant Japanese telecommunications monopoly, is expected to announce sincre than \$100 million worth of purchases of U.S. equipment this week in an effort to blunt criticism that it has not fully complied with an

greament to open the company to U.S. products.
Sales in 1981, the first year of the agreement, amounted to \$15 million art jumped to \$40 million last year. Nonetheless, U.S. trade officials said hat the U.S. share of sales totaled less than 2 percent of NTT's \$3 billion

Some Vauxhall Workers End Strike

LONDON (Reuters) — Striking union workers at the Dunstable and union plants of Vauxhall Motors Ltd. voted Tuesday to accept the tompany's revised pay offer and will resume work Wednesday, a Vauxall spokesman said.

The contract, whose term was reduced from the 14 months originally proposed to 12 months, gives workers an effective 7.75-percent pay

man for Vauxhall, a unit of General Motors, said that because on the decisions at the southern England plants, 2,400 workers at the company's Ellestnere Port plant in Cheshire are reconsidering a vote aken Tuesday to continue the strike which began Friday.

Repayments Stopped to Macao Bank HONG KONG (Reuters) — Hang Lung Bank has stopped repayment f money deposited with it on behalf of Macao's Banco do Pacifico Sarl,

coording to Hang Lung's managing director, David Turner.

Hang Lung took the action following the early closure of Banco do action Friday after its clearing bank refused to clear some of its checks, e said. Hang Lung was taken over by the Hong Kong government last eek for failing to meet its liabilities to its clearing bank.

Some Eastern Workers Accept Cuts

MIAMI (UPI) — More than 97 percent of Eastern Airlines' nonunion bring employees have said they would accept 15-percent wage cuts, the m impany says, but it insisted the sidine will be forced into bankruptcy at aless union workers also approve the cuts.

Union leaders representing machinists and flight attendants have fused to put the wage-cut proposal up for a vote by their members. Airbus Sales Faltering as New Project Gears Up

viability of the whole project depends on widening our range by building the A-320," Bernard Lathpresident of Airbus Industrie, said in a recent interview.

But many analysts think that the real issue is whether Boeing will eventually wind up with a world monopoly. "Lockheed had already ne out of the civilian aircraft ousiness and McDonnell Douglas's activity is much reduced." Mr. Pailferet said, warning that "if we falter, there will only be Boeing left."

Europe's present Airbus, which exists in two versions known as the A-300 and the A-310, is built in combersome fashion with the national aircraft company of each participating country producing part of the plane. Final assembly takes place at Toulouse. West Germany's MBB is responsible for the fuselage; British Aerospace builds the wings; France's Aerospatiale, the cockpit, and a Spanish compa ny, the tail fin.

Nevertheless, from 1979 through 1982 the European Airbus had been doing well, easily achieving its backers' goal of capturing at least 30 percent of the world market for planes in its class. .

In 1979, it pulled ahead of Boeing when it took 38 percent of the market for wide-bodied aircraft, compared with the American company's 37-percent share, even though the Airbus does not compete with Boeing's long-distance 747 airliner.

In 1980, Airbus slipped to second place, with 32 percent of the market, compared with Boeing's 51-percent share. But for the last

ADVERTISEMENT INTERNATIONAL FUNDS two years years Airbus has held were expected to place orders soon. are waiting to see whether the ma-more than half of the world market. But he warned that this year "we ior manufacturers built a plane inaccounting for 56 percent of sales

in 1981 and 52 percent last year. But this year Boeing is staging a Airbus executives are not just comeback. Demand for new jets is still weak as airlines struggle to recover from the recession, but of the 23 wide-bodied planes sold so far, Boeing accounts for 15. In addition to the nine 767s going to Japan, it has sold six to Quantas, the Australian airline.

Airbus Industrie claims six genuine sales to Singapore Airlines so far, but is not counting another two planes sold to Thai International because the carrier tried to get out of its contract and buy Boeing air-

"I am confident we will get more sales in the closing months of this year," Mr. Pailleret said, recalling that airlines in Zimbabwe, Angola, India, South Korea and Kenya

may not make our 30-percent tar- corporating more advanced tech-

looking for sales for their existing planes. They also want to sign up buyers for the proposed A-320. Along with American producers, believe that demand for a 150seat airliner will grow faster than that for any other plane, with estimates of total sales ranging from 2,000 to 3,000.

So far, only France's two stateowned airlines have agreed to order the A-320 and put up some of the development money. Mr. Pailleret said he was not disappointed that British Airways decided to lease improved Boeing 737's earlier this year. All airlines are leasing new 150-seat aircraft these days rather

mediate or delayed delivery.

WASHINGTON - Flounder rushed into Bass' office at the State Department and cried, "The secretary wants a slide presentation on the elections in Enchilada to show to the American peo-

"I anticipated that," said Bass. "I've been putting one together. Sit

"This is Garcia family, which lives in Miami and which financed the Liberal Peasant Assassination Party of Miguel Tortilla." "Who is Tortilla?"

"He is known as 'The Hammer because his people like to beat on opposition politicians with hammers. In 1971 we called him Enchilada's 'Criminal of the Year.' But he got 25 percent of the vote."

"Wow, it's going to be hard for us to support him."
"Not necessarily. We found a

If you purchased this Trib at a newsstand, you're already enjoying a rare bargain—the whole world in just a few tightly written, fact-packed pages. You're reading a product created by scores of journalists working day and night from dozens of distant datelines to bring you a compact compilation which can be purchased for the price of a cup of coffee.

But why not double the bargain? Enjoy twice as many newspapers with double the headlines, business trends, candid commentary, high fashion and comic strip hi-jinks, and Art Buchwald three times a week, too.

By subscribing to the International Herald Tribune for six months or a year, you save almost half the newsstand price on

WASHINGTON - Every time Secretary of Defense Caspar Weinberger goes ahroad. I get the willies. The success of every mission seems to be based on how much U.S. military equipment he can give or sell to the country he visits, as well as his ability to persuade the head of the state he is

drinking tea with to build up his armed forces. I don't mind when Weinberger

does a selling job on a Third World power, but I start shaking when he puts pressure on a country like Japan to get its mil-itary act together.

This is what Secretary Weinberger has just done on a trip to Tokyo. He wants the Japanese to rearm and become a military power to be reckoned with.

To those of us who served in World War II, memories die hard when it comes to allowing a power-

each copy. Up to 42% off, to be precise. Twice as many Tribs

for your money.

Join the global who's who of thought-leader readers who turn to each morning's Trib for the latest in objectively reported world news, briskly written opinion, the day's closing business tabulations, buy-and-sell reports from the international market-place, at-the-stadium recaps of just-completed matches, what's happening in the world of culture-and all in

an international perspective.

Double the value of the Trib by halving its price. Subscribe now so you don't miss a single issue. Major credit cards accepted. Just fill out the coupon below and mail. For maximum savings, subscribe for a full year. This cut-price

subscription offer is for new subscribers only.

CIT Pact Brings New Renown To McGillicuddy of Hanover

New York Times Service

Charles State Or An to St

NEW YORK — Late last month, John F. McGillicuddy made banking history when his company, Manufacturess Hanover Corp., agreed to buy CIT Financial Corp. for \$1.51 billion.

No bank-holding company has uer spent as much on one acquisi-ion. And Mr. McGillicuddy, chief geentive of the parent and its flaghip subsidiary, Manufacturers fanover Trust Co., the fourth-largest U.S. bank, wears a relic of the egotiations on his wrist, It is a aperman watch, a gift from his

It is characteristic of Mr. McGilcuddy that although he is unoutstedly one of the most infinenal bankers in the world, he wears a 1:10 watch. "I don't believe in doing and spectacular just for the sake of oing the spectacular," he says. But by anyone's measure, the eal he has helped bring about is pectacular. If the agreement to my CIT, a consumer- and comrecial finance company, from CA Corp. is consummated, Manfacturers Hanover will have more han 1,000 finance-company ofces across the country, up from its irrent 728, and will add more than 7 billion to its \$63.3 billion in total

on belongs to the Manufacturers anover Trust unit. bt my blood running again," said
fr. McGillicuddy, who at 52 years
did has been running Manufacturis Hanover for 13 years and has nother 13 years to go before man-story retirement. He says he plans retire before then but does not. ly, when. He has been with the

mpany since 1958. Next year, after the scheduled threment of Walter B. Wriston as nairman of Citicorp, Mr. McGilli-addy will become the dean among raders of the nation's 10 biggest

"People talk a lot about those lings," he said, "but I don't place across: teat store in them. You are what ou are. We are all propelled by the lack of any movement by Congress keeps him out of much of the lime-opened it, I found Superman."

organizations we're with, as well as to remove the barriers to full interpropelling them.

"I'm not Walter Wriston. If you are the CEO of the biggest banking organization in the country, then people will put a lot of store in what

you say, just because you sit in that position," Mr. McGillicaddy said. In any comparison between him and Mr. Wriston, the resemblance ends with their longevity. While Citicorp's leader often philosophizes and even pontificates on a variety of subjects, Mr. McGilli-cuddy's inclination is to zero in on

"A lot of people put a lot of stock in making pronouncements of what the world will be," Mr. McGillicuddy said. "I have tremendous respect for Welt Wriston, but I'm not Walt. I believe in putting one foot in front of the other and doing the most solid, professional job you can. I don't put much stock in pronouncements, I put stock io

And unlike Mr. Wriston, a strident proponent of free markets, Mr. McGillicuddy is not wedded to any philosophy, even deregulation. He believes that at times the government has a role to play, as it did in the financial rescue of Chrysler

"I believe in the free market as much as anyone else," he said, "but Se 14 s sets. Of those assets, \$57.63 bilthere are a lot of tough issues in life and none of them are black and white. Unfortunately, most are gray, and reasonable men can dif-fer."

Mr. McGillicuddy's style is to concentrate on a particular problem rather than to ramble freely. At Of the \$1.51 billion that Manufactimes, in fact, he seems annoyed turers Hanover has agreed to pay when an interviewer strays from for CIT, \$460 million would be in the theme he has chosen. .

light that Mr. Wriston enjoys, it also is one of Mr. McGillicuddy's

His ability to focus narrowly was an important element, for example, in his Herculean and successful effort in 1970 to rescue Chrysler from bankruptcy. As Chrysler's chief banker, Mr. McGillicuddy kept Chrysler's 1,000 or so creditor banks in line and avoided forcing the company into involuntary bankruptcy.

In business, he demands loyalty as well as teamwork -internally as well as with customers. Mr. McGillicuddy is especially eager to get CIT managers into the Manufacturers Hanover organization, even before the acquisition takes effect, which he expects early in 1984. One in the New York market.

of his greatest fears about the pact
is that some CIT employees may become jittery and leave.

It is clear that the CIT pact has been uppermost in his mind recently. He looked down at his Superman watch, a souvenir of the negotiations that led to the agreement.

"My watch broke during the ne-gotiations," Mr. McGillicuddy re-For example, in a recent interview, Mr. McGillicuddy wanted to talk about the CTT pact and how great it was for the bank and its stockholders. As he sat in his 50th-floor private dining room in the bank's Park Avenue headquarters, it was clear that he had corefully in the part of the sale to get a containt of the watch because I'm on the board of the company that makes them. Usually I'm a very punctual person, but I kept coming late to the meetings. So my colleagues went out and bought a watch and put it in a Roler boy. When they gave it higher price for any stock that in a Rolex box. When they gave it might be sold and cut the cost of to me, I thought, 'Oh, how nice of them to spend so much money to

Investor Group to Purchase Amstar Corp. for \$428 Million

the largest U.S. refiner of cane sugar, said Tuesday it had agreed to be acquired by an investor group for \$47 a share in cash, or a total of \$427.7 million.

The group is led by Kohlberg Kravis Roberts & Co., a privately owned merchant banking firm with offices in New York and San Francisco. Since it was formed in 1976, the firm has specialized in acquisi-tions, particularly buyouts that in-volve current management as investors in the newly acquired

company.
Indeed, Amstar and Kohlberg Kravis Roberts said in their joint announcement that certain members of Amstar's management bers of Amstar's management world sugar market. The company would have the opportunity to be-

for purposes of acquiring Amstar. They did not disclose who those billion in its fiscal year ended last executives were.

The proposed transaction is subject to a definitive agreement and approval by Amster's shareholders. Amstar's board already has approved the proposal. The an-nouncement said Amstar's 5.44 percent preferred stock and 5.3 percent subordinated debentures would remain outstanding after the

merger.
Amster, which produces Domino and Spreckels sugar products, cut costs by closing three sugar plants recently, returning to profitability this year despite a depressed

Clarendon Is Seeking To Overturn Tax Levy

By John Kennedy

NEW YORK - The former New York subsidiary of Marc Rich & Co., the Swiss commodities-trading firm that was charged with income-tax evasion last month has asked a federal court here to overturn a \$90-million assessment leveled against it last Friday by the Internal Revenue Service.

Lawvers for Clarendon Ltd. said that the IRS ordered 13 banks with which it does business to freeze Clarendon deposits to cover taxes the agency claims Clarendon owes.

In a lawsuit filed Monday in U.S. District Court here, Clarendon said the so-called jeopardy assessment levied by the IRS effectively put the commodities-trading firm out of business because "virtually all of the assets of Clarendon have been restrained."

Last month, Clarendon, which formerly was known as Marc Rich International Ltd., Mr. Rich's Swiss company, Mr. Rich and two of his associates were indicted on a \$48-million tax-evasion charge, the biggest tax-evasion indictment ever

Federal officials could not explain how the IRS arrived at a \$90the amount mentioned in the in-

dictment. Federal prosecutors have said, however, that if they could get their hands on Marc Rich documents now in the custody of the Swiss governent, they could prove that the companies evaded substantially more than the \$48 million

mentioned in the indictment. Eleven of the 13 banks that received the IRS optices joined with Clarendon in asking the court to stop the IRS from enforcing the ents. A lawver representing the banks said that Clarendon owes them about \$130 million.

U.S. District Judge Richard Owen took no action on Clarendon's petition and ordered every thing to remain at a "standstill" mnil he holds another hearing.

For nearly 30 years, NOVA, AN ALBERTA **CORPORATION** has been actively engaged in the business of transporting

The Company's Alberta gas transmission system, one of the largest of its kind in the world, carries over 75 percent of Canada's marketed natural gas production each year.

In the past lew years, NOVA has expanded its gas transmission base. It co-sponsored, and today is half-owner of, the two most recent major gas pipeline projects to proceed in Canada: the Alaska Highway Gas Pipeline and the Trans Quebec and Maritimes Pipeline.

NOVA is now marketing the transmission and pipeline expertise gained in developing these projects to clients around the world.

Over the past ten years, NOVA has built on this strong gas transportation and marketing base, moving into related areas: petroleum, petrochemicals and manufacturing. Activthes being pursued in these business sectors include:

well as enhanced recovery of heavy oil and offshore World-scale production of

Earnings per common share—Basic	\$ 0.5	25 \$ 0.32	\$ 0.80
-Fully diluted	\$ O.:	24 \$ 0.30	\$ 0.74

Consolidated net income for the first six months of 1983 increased by 18% over the same period in 1982. The increase was principally due to Improved performance in Canadian oil and gas activities in the petroleum sector. Petroleum and manufacturing contributions were adversely affected by the decline in the United States oil and gas industry; however, these disappointing results are industry wide and are not expected to prevail for an extended period.

Despite the increase for the period in consolidated net income, basic earnings per common share fell, owing to a greater number of common shares outstanding and to an increase in preferred share dividend entitlement. The latter is the result of 1982 preferred share equity financings which strengthened the financial position of the Company and reduced variable rate debt.

AN ORDERLY MAN

The state of the s

By Dirk Bogarde, 286 pp. \$14.95. Knopf, 201 East 50th St., New York, N.Y. 10022.

Reviewed by Mande McDaniel

D IRK BOGARDE calls his muse a dud,
but in my opinion she's simply bushed.
Who wouldn't be, after years of such intensive,
versaile inspiration, ranging from his youthful
poetry and art, through 60 motion pictures of
steadily invilding excellence to (since 1977) steadily building excellence, to (since 1977) two books of top-notch film-star autobiography and two strikingly adept novels? If his muse falters at all, in this thoughtful third volume of his memoirs, it's only for a few pages, until he manages to "grab her, wrestle with her, beat her about like a drunk." Curiously enough, this muse abuse seems to work, for she has picked herself up and pointed him on to another signal triumph.

That's not to say that "An Orderly Man" will appeal to readers who devoured "Snakes and Ladders" for its anecdotes (even then, poignant rather than sensational) about such stars as Judy Garland, Noel Coward and Kay Kendall. Here Bogarde moves on to a new homeland, but returns to the same country of the spirit he roamed in his first book, "A Postillion Struck By Lightning." Major features of the landscape are the domestic details of his life (now in his 500-year-old house in France) and his relationship with his sister Elizabeth and his parents. He still has yarns to tell about such film-world greats as Luchino Visconti and Sir John Gielgud, but the movies slip in billing as he finds himself increasingly the little of the deficiency of the still has the difficulties and delights of the still has the still had the still has the still had the still fulfilled by the difficulties and delights of runming his household, and the development of his

After a bewildering history of real-estate shuffling, Bogarde finds his last resort on the Riveria, where the problems of renovating and managing his 12-acre estate seem formida-ble. This plunges us immediately into a conti-nental version of "Mr. Blandings Rebuilds His Dream House." But just as the reader becomes surferred with the depressing vagaries of ancient plumbing, rats in the roof, and 400 dying olive trees, his parents arrive to leave the first "layer" of memories upon his remodeled home, to "start the slow, subtle application of a patina of life on it."

In the absence of wife or children (marriage are "made in a double bed, and when that wears off there's not much left except habit, or duty") his deepest familial ties are reserved for Elizabeth, with whom he has continued the childhood relationship celebrated in "Postillion," and his parents, elderly now and presented with fond sensitivity. His beautiful, mercurial mother forever marked by her frustrated career as an actress, and his father, dry, reserved, and orderly as Bogarde him - they steal the scene whenever they're on

Although Bogarde is obviously caught up in his successful new career, he by no means ignores his work in films. This period covers gnores his work in thins. This period covers some of his most important ones, including "The Night Porter," "Providence," "A Ridge Too Far," and "Despair." His analytical habits produce interesting conclusions about movie acting ("performing before a camera is what you don't do. You work to it. And beyond it"); the movie business ("The Seventh Art is now but a coold near of his Provinger"); and this but a small part of Big Business"); and the relative lack of success of his later films in-America (the United States is an immigrant 15 GROWING UP, by Rassell Baker

land" and has simplified out "the wit, the nuance, the irony, and, perhaps above all, the style of the English language" so that "a film like Providence, based on these very essentials of speech," is sure to "founder as it did").

Certainly, what with tombola stalls, Harpic down the lay, and "Dr. Stiffkey atting in his harrel on Blackpool Pier," Rosein land to the lay and "Dr. Stiffkey atting in his harrel on Blackpool Pier," Rosein land to the lay and "Dr. Stiffkey atting in his harrel on Blackpool Pier," Rosein land to the lay and "Dr. Stiffkey atting in his harrel on Blackpool Pier," Rosein land to the lay and "Dr. Stiffkey atting in his harrel on Blackpool Pier," Rosein land to the lay and "Dr. Stiffkey atting in his harrel on Blackpool Pier," Rosein land to the lay and "Dr. Stiffkey atting in his harrel on Blackpool Pier," Rosein land to the lay and the lay atting the lay a

Certainly, what with tombols stalls, Harpic down the lav, and "Dr. Stiffkey sitting in his barrel on Blackpool Pier," Bogarde doesn't always talk American. Also, he rather cherishes certain perverse curmudgeonries, like disliking autumn and hating Christmas. Furthermore, I suspect he may protest his orderliness too much: there's an impression here of more turbulent depths that he does not plumb, not, I hasten to add, need he do so to satisfy a nor, I hasten to add, need he do so to satisfy a reader's crude curiosity. (No randy jokes here he warns, or "who I slept with, that kind of thing," and what a relief it is not to watch dirty laundry flapping in the breeze.) Less forgivable is his tendency to shove people into the action without introducing them, a result, no doubt, of his orderly expectation that everyone will have already read the two preceding volumes. Nevertheless, Bogarde neatly settles any argument over whether he is an actor who can write or a writer who can act. Thinks perhips

write or a writer who can act. Thanks perhaps to that poor bruised muse, Bogarde has turned out to be an artist who jolly well does both. Maude McDaniel, a cohemnist for the Cumberland (Maryland) Times, wrote this review for

ON the diagramed deal, North-South were using a medium no-trump, with a 14-to-16 point range. A transfer sequence landed them in four hearts, and West led the diamond queen. .

South won, led a trump to the king and played the club nine, a fatal error. A duck would probably have succeed-ed, but East found a masterly defense to defeat the game against any declarer play. He put up the club king and returned the eight so that his

ex: 697,40

There was now no way for card. South to avoid the loss of two more tricks, one in spades and one in diamonds.

This was a considerable surprise to the commentators, %EJ992
who had expected the contract og J1074 to succeed. South would have done better, as it turned out, if he had drawn a second round of trumps, or if he had led the club seven instead of the nine. As it was, he would have survived with any other defense by drawing the missing trumps and establishing a club trick

OBSERVER

Too Much Wattage

By Russell Baker N EW YORK —Once again the president has not fired James Wate I marvel at his endurance. The president's endurance, that is, oot James Watt's.

Watt has a limitless supply of ideas for getting fired, and every time he explodes one under the president's nose, Reagan has to come up with a new way oot to fire

Here is why Reagan makes a better president than I would. If I were president, after Watt tried to get himself fired three or four times f'd say, "Look, Jim, I'm a busy man and you're just another secretary of the interior and, while it's been nice knowing you, I'll see you around the drugstore someday, okay?"

Reagan bas more patieoce, though. He endures. Somebody comes into his office, says, "You'll never guess what Watt's come up with this time," and what does the president say?

Does he say, "Listen, man, I've got the Russians carrying on like hyenas, f've got to do something about these H-bomb negotiations Druse is and why Syrians don't like Maronite Christians so I'll know what to do with the Marines, so if Watt's trying to get fired again get him oo the phone and I'll fire him right now"?

No, the president does not say that. He orders the White House into a nonfiring mode.

I imagioe klaxons sounding through the White House and an amplified voice saying, "Now hear this: All hands stand by to oot fire he managed to stir up blacks, Jews, Watt." Obviously f've spent more time in submarine movies than in the Reagan White House, as a Reagan staff man ooted when I in-

"Actually," be pointed out, "we've got the work of not firing Watt down to such smooth routine that it hardly interferes with the president's wood-chopping any-

It was harder in the administration's early days because, he explained, you never knew where Watt was going to strike. He might suddenly announce that the twoparty American system was made up of Republicans and Communists, or he might shake up the Indians by calling their reserva-

tions examples of failed socialism. He might even blast Nancy Reagan's taste in music by bombing the Beach Boys as apostles of vile and degraded living.

The White House realized that to avoid firing him it would have to equip itself to be ready for anything Watt could unloose. A Reagan staff man has told me some of the future contingencies the White House is prepared to deal with.

Suppose, for example, Watt makes a speech announcing that Senator Nancy Kassebaum, the Kansas Republican, is the spiritual heiress of Karl Marx. This would create a Republican demand to fire him. To stop the firing, he would be ordered to the White House and would have to apologize to a press conference while wearing a fake Karl Marx beard and a senatoriallooking woman's dress.

The resulting laughter, it's as sumed, would put things right with the public, and Watt would have to devise a new challenge to the presi-

"But surely dangerous numbers and I've got to find out what a of women would oot laugh about seeing the bearded secretary in drag," f noted. "They would be outraged by the sexism of the joke, and demand he be fired."

"We have anticipated just such a possibility," my informant said. "If it happens that way, Watt will be sent to the convention of the National Organization for Women, not as an after-banquet speaker, but to wash the dinner dishes."

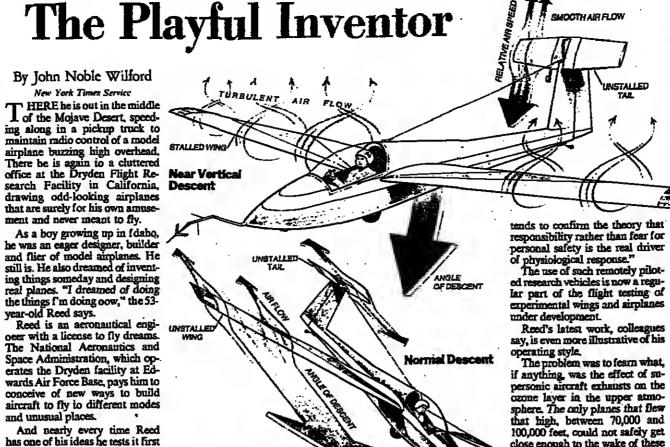

Watt's latest maneuver, in which women and people with physical disabilities, was fairly easy to turn aside by invoking the familiar "media-storm" defense.

The theory here is that if newspapers and broadcasters wouldn't report the outrages of public men, the public wouldn't know about them and, hence, nobody would be up-set. When such things do get reported the eosuing trouble is

blamed on the reporters.

That old line — The butler did it" — is everywhere being revised to read, "The media did it," and the new cliche made it possible for the president once again to outwit the resolute Watt.

New York Tunes Service

Reed design for plane that can go almost straight down.

Alfred Eggers at NASA's Ames
Research Center in Mountain
View, California. Reed flew his

reaching application. He had observed the increasing use of small drone aircraft in flight research. model and had his wife, Donna, take movies to show that the concept produced a stable vehicle. Even so, the space agency rejected the idea as too risky and opted for the mert capsule for Apollo.

But Reed, not one to let go of an idea, got permission to build a larger version of the lifting body for a manned test flight. He and a few workmen set up their "bicycle shop," an allusion to the place where the Wright brothers worked, and built a 1,200-pound craft out of steel tubes, surplus parts and a wooden shell. You might say that's where the shuttle was born, in an old shed out in the

desert" Reed remarked. sign was based on studies of a Soon afterward Reed hit upon half-cone body conducted by Dr. another idea that would have far-

- still ground-based, but containing all the instruments and

Reed tested the concept in the early 1970s with a stiletto-shaped lifting body called Hyper 3. Milt Thompson, getting his cues from closed-circuit television and data radioed from the craft, flew Hyper 3 from the ground. "I was really stimulated emotionally and physically just as in actual first flights," Thompson said, "This

sensors of a fully-equipped air-

They were operated either with a preprogrammed autopilot or from the ground, where an engi-neer could send up certain simple commands. Why oot, Reed asked himself and some of the test pilots, substitute an actual cockpit

mental impact. Why not, Reed asked, build a light pilotless plane with wings large enough to pro-vide sufficient lift in the thin air? "You don't come up with ideas strictly solo," Reed conceded, and in this case he got some important help from James Akkerman, a propulsion engineer at the John-son Space Center in Houston. He heard that Akkerman had been experimenting with hydrazine en-gines. Hydrazine, a liquid propel-

> poses ioto a hot gas. Reed designed the plane, which is mostly a 22-foot wing with a small pod for carrying scientific sensors, and Akkerman built the hydrazine engine. The Mini-Sniffer, as it was dubbed, takes off, climbs to the altitudes where it wants to sniff something and then comes down to land - all the time being controlled by radio in a fashion not unfamiliar to the

model airplane hobbyists. When Reed went to the Jet Propulsion Laboratory in Pasadena,

California, to discuss an engine problem, Jose Chirivaella grew excited about an even more immense journey for the little Mini-Smiller flights over Mars. Because it is so light, it could be folded and packed aboard a spacecraft. Because it was designed for flight in the Earth's thin upper atmosphere, it should have no trouble in the thin Martian atmosphere. And its hydrazine engine should do fine with no

zine engine should do fine with no oxygen, only carbon dioxide.

Accordingly. Reed redesigned the craft for cruising over the Martian terrain, setting down to collect samples and taking off again. It could cover about 4,000 miles

In designing the sniffer to make vertical landings on Mars, Reed drew again on his knowledge of model airplanes to conceive of a horizontal tail that can be tilted up at much as 80 degrees, making it almost vertical. This has the effect of putting the plane mto a deep stall so that, if properly controlled, it descends as if under a parachute. Reed, naturally, built some model airplanes to test the concept; earlier this month, test pilots flew a sailplane through such a controlled deep stall.

Reed sees several possible ap plications. Such a tail, a stabilator, could be provided for some advanced fighters so they could fly extreme angles of attack withclose enough to the wake of these powerful jets to test the environout going into a dangerous spin. It could be a safety feature on small private planes, or recover remote-fy piloted vehicles through heavy turbulence. Or someday it could be part of a craft flying low over the carryons of Mars.

One thing does seem to lead to another, the remotely controlled vehicles to the Mini-Sniffer, to the Mars plane and the controlled deep-stall plane. What is Reed's ultimate dream? Without hesitalani used for spacecraft thrusters, tion, he says it is the "eternal does not oeed air because in the endurance airplane," a plane that presence of a catalyst it decomcould conceivably stay up forever. He also calls it the "poor man's

This idea, which has yet to fly, is a lightweight plane that could be powered by solar energy. The plane would circle an area at some high altitude where it could act as a communications relay station or as a military or scientific observation post. "I can foresee the need," Reed, the aeronautical innovator, said, "but f haven't convinced the leaders of NASA: I'll just have to wait and be ready with my design and models."

PEOPLE Rescued Sailor Refuses To Abandon Tiny Boat

A British sailor resumed his bid

to break the record for the smallest boat to cross the Atlantic after being fed and resupplied aboard a Soviet trawler, the British coast guard said. Tom McNally, a 40gnard said. Tom McNally, a 40year-old engineer from northern
England, rejected appeals from the
coast guard and the Royal Air
Force to give up after being picked
up in his bathtub-sized boat by a
Soviet trawler. "He insisted on getting back in the boat after being
refueled, fed and given supplies by
the Russians, who virtually lifted
his craft on to the trawler," said a
rescue services spokesman in the
southwest Frederick rescue services spokesman in the southwest England port of Falmouth. McNally left Newfoundland Aug. 16, hoping to make the crossing to 50 days. He is seeking to break the record set to August Inc. Former British Army commando, Tom McLean, 4f, who crossed the Atlantic to a 7-foot, 9-inch boat, the Giltspur, in 62 days, 10 hours. Tom Coppin, district controller of the coast guard, estimated the cost of helping McNally at £30,000 to £50,000 (\$45,000 to \$75,000).

Recoil Wallenberg, the Swedish diplomat credited with saving thousands of Jews from Nazi death camps, has been made an honorary camps, has been made an actionary
U.S. citizen. A bill anthorizing honorary citizenship was signed into
law by President Round Reagan in
October 1981. A ceremony conducted Monday by District Court
Judge Mark Costantino in New
York formalized Reagan's act. By
making him a citizen, the Unifed making him a citizen, the United States can legally make inquiries of the Soviet government into the diplomar's whereabouts. Wallenberg, Swedish consul to Hungary during
World War II, provided Swedish
passports to many Jews in Buda
pest. In 1945 he was taken by Soviet officials into what they called protective custody." There have been persistent reports that he is still airve, but Soviet officials said in 1957 that Wallenberg had died 10 years earlier.

John V. Lindsay Jr., 23-year-old son of the former mayor of New York City, was sentenced to six months in jail in Hauppage, New York, for selling cocaine to an un-dercover police officer. Lindsay pleaded guilty in July to criminal sale of a controlled substance.

year-old Reed says.

and unusual places.

by building and flying a model of the vehicle. He may be tall and

balding, but there is still a lot of

the dreaming, tinkering little boy in the man who is Dryden's man-

There is, in general, an ecooc-

my to his approach to innovatioo:

be rarely wastes an idea, his or

someone else's, and often applies

one basic idea to a succession of

inventions, one thing just leading to another and another.

In the early days of space flight,

for example, engineers had still not decided on the shape and fly-

ing characteristics for the Apollo

spacecraft to take men to the

moon and back. Reed, among a

few others, favored a design

known as a lifting body. The en-

tire vehicle, shaped something

like a flatiron, served as the air-

foil; it could thus fly without

wings and glide to a runway land-

Determined to generate confi-dence in the wingless-airplane

concept, Reed did what he often

does: He built a model. The de-

ager of innovative programs.

COMPUTER PORTRAITS NOW IN FUL COLOR

AN INSTANT MONEY MAKER

THAT CAN EARN YOU

\$8000/\$10,000 PER MONTH

Bock in the fifties, if someone had
suggested you invest in a homburger
stand colled McDonold's or a chicken
store run by Colonel Sonders, you
probably would have loughed. Most of
us did. The first who didn't and invested
are militariories today. Testerday, however, they were just budding entrepreneurs looking for a good investment. The trick to investing in your own
business is to keep your eyes open for
something that (if) requires a small investment find can be recouped quicity,
(2) has an enormous profit margin and
(3) has great, growing consumer
compliance.

(3) hos great, growing consumer occeptance.

HOTTEST NEW BUSINESS
Computer Portracts is such a business, and it is one of the hottest, most profitoble new businesses in the world.

NO SIGIL INVOLVED
It is a business that combines today is hottest trends. TV conserves and instant pictures. A high quality system that is low in prices, portable, and requires challength in technical experience.

The System can be set up anywhere fairs, holdry areas, shapping centers, conventions, hottory areas, and computer printent. Tota can transfer the portraits - shapping center from \$10,000 - \$35,000.
